Chance of cloud free summits?	Lifting to 60%	60%
Sunshine? Air clarity (below cloud)	Cloudy periods, but also spells where the sun breaks through. Visibility good or very good at times, but poor in any heavy showers.	Varied cloud and occasional sun. Visibility good.
How Cold? (at 700m)	8 to 10C	7 to 9C.
And in the valleys	7C at dawn, rising to 15 to 17C	7C at dawn, rising to 15 to 17C.

Planning Outlook

All mountain areas of Britain from Monday, 6 May, 2024

Weather patterns remain slow-moving, but high pressure tends to build into midweek to bring a fair amount of dry weather which may well last through next weekend. Briefly cooler in northern Scotland early in the week, but mostly fairly warm and winds often light. Some rain-bearing fronts may return to northwestern Scotland at times. Occasional scattered showers in the afternoons elsewhere.

Forecast issued at 16:00 on Saturday, 4 May, 2024

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2024.
