General Summary for Monday, 6 May, 2024

British Mountain Summary:

Based on forecast chart for noon 6 May, 2024

Central, east and southern Scotland sees areas of rain from early in the day - these then redeveloping into local thundery downpours into afternoon. For England and Wales, scattered heavy and locally thundery showers also forming later. Winds fairly light overall. Varied cloud bases, limited sun.

Headline for Yorkshire Dales & North Pennines

A little rain morning, then showers, local thunderstorms forming.

Detailed Forecast for Monday, 6 May, 2024

How windy? (On the summits)	Light and variable, 5 to 10mph or at times calm. Risk local sudden gusts of 25mph around heavy showers.
Effect of wind on you?	Mostly small
How wet? (Precipitation and its impact)	Patchy rain, local thundery downpours afternoon. Areas of light rain or drizzle from dawn, mainly northern Pennines; several hours likely dry toward southern Yorks Dales NP. By afternoon, increasing risk of showers forming, localised heavy bursts with thunderstorms.
Cloud on the hills?	Local areas of low cloud, mainly north Banks of low cloud at varying heights from dawn, focused over northern Pennines, but hills mostly clear further toward south. Bases will tend to rise and break up with clearances, but reforming in showers.
Chance of cloud free summits?	70%
Sunshine? Air clarity (below cloud)	Cloudy periods, but also spells where the sun breaks through. Visibility good or very good at times, but poor in any heavy showers.
How Cold? (at 700m)	7 to 10C, coolest North Pennines.
And in the valleys	6C at dawn, rising to 14 to 16C

Planning Outlook

All mountain areas of Britain from Tuesday, 7 May, 2024

High pressure builds from the west to be centred over England and Wales into midweek. A fair amount of dry weather in the outlook which may well last through next weekend. Isolated afternoon showers some days. Some weak fronts drifting in from the Atlantic on southwesterly winds bring a risk of occasional rain to the West and Northwest Highlands, with mountains covered in cloud for periods here, especially near to coasts in west. Often dry with higher cloud bases toward the central and eastern Highlands. Briefly cooler in northern Scotland early in the week, but mostly fairly warm and winds often light.

Forecast issued at 16:10 on Sunday, 5 May, 2024

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2024.
