

Peak District

The southernmost Pennines, covering the entire Peak District National Park, also extending north to hills accessed from Hebden Bridge, and including the hills immediately north of Manchester.

Alpkit is a multi-activity outdoor and bike brand for enthusiasts and adventurers making technical equipment to help you enjoy the outdoors whatever the weather. Go Nice Places, Do Good Things.

General Summary for Tuesday, 7 May, 2024

British Mountain Summary:

Based on forecast chart for noon 7 May, 2024

High pressure extends in from the west, but remnants of previous showers leave a zone of low cloud and drizzly rain over central Scotland which may linger. Local showers forming. Brighter but rather cool for the northern Highlands. Fairly cloudy England & Wales, isolated showers. Light winds overall.

Headline for Peak District

Mostly dry. Varied cloud, a little sun, becoming sunnier later.

Temperature (at 600m)	8 to 11C.	9 to 13C.
And in the valleys	5 to 7C at dawn, rising to 15 to 17C.	8C at dawn, rising to 17 to 19C.

Planning Outlook

All mountain areas of Britain from Wednesday, 8 May, 2024

High pressure is nearby during the week ahead, but weak fronts drifting in from the Atlantic on southwesterly winds bring periods of rain and drizzle to western Scotland - the mountains often covered in cloud here. Drier with higher cloud bases toward the central and eastern Highlands. England and Wales mostly dry, isolated showers, hills often clear, light winds and mild or increasingly warm. Dry and warm for much of Britain to start the weekend with southerly breezes, but a greater risk of some rain or showers by Sunday. Showery conditions more likely into the start of next week with lower pressure likely.

Forecast issued at 16:30 on Monday, 6 May, 2024
