## General Summary for Tuesday, 7 May, 2024

### British Mountain Summary:

#### Based on forecast chart for noon 7 May, 2024

High pressure extends in from the west, but remnants of previous showers leave a zone of low cloud and drizzly rain over central Scotland which may linger. Local showers forming. Brighter but rather cool for the northern Highlands. Fairly cloudy England & Wales, isolated showers. Light winds overall.

#### Headline for Southeastern Highlands

Cloudy, dull and drizzly; slow improvement, risk a shower.

## Detailed Forecast for Tuesday, 7 May, 2024

<b>How windy? (On the Munros)</b>	Variable 5-10mph or less.
<b>Effect of wind on you?</b>	Mostly small
<b>How wet? (Precipitation and its impact)</b>	<b>Drizzly, risk showers afternoon</b> Patchy drizzly rain in the morning, locally damp for a few hours central areas, tending to fade out. One or two showers forming into the afternoon, moving around slowly.
<b>Cloud on the hills?</b>	<b>Extensive, slowly lifting, some breaks</b> Banks of cloud at various heights in the morning, but shrouding many hills, plus patchy fog in some glens. Will lift toward higher slopes with some breaks forming toward tops, best later in day.
<b>Chance of cloud free Munros?</b>	<b>20% later rising to 50%</b>
<b>Sunshine? Air clarity (below cloud)</b>	Mostly cloudy, glimpses of sun mainly afternoon. Dull or misty in the morning, visibility becoming good during afternoon.
<b>How Cold? (at 900m)</b>	4 to 6C.
<b>Freezing Level</b>	Above the summits

**Southeastern Highlands - Looking Ahead**

	<b>Wednesday 8 May</b>	<b>Thursday 9 May</b>
<b>How windy? (On the Munros)</b>	South to southwesterly 20mph, speeds strengthening to 30mph higher summits.	West or southwesterly 15 to 25mph.
<b>Effect of wind on you?</b>	<b>Feeling increasingly breezy, may start to affect comfortable walking on exposed tops.</b>	<b>Fairly small</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Rain unlikely</b>	<b>Little or no rain</b> Risk of a little light rain or drizzle overnight and into morning, fading out. Chance of an isolated afternoon shower.
<b>Cloud on the hills?</b>	<b>Many tops clearing</b>  Banks of cloud around some slopes in the morning, plus local mist some glens at first. Lifting toward higher tops with breaks forming to most summits. Lowering cloud may spill into central highlands later.	<b>Mostly central areas, lifting</b>  Covering higher terrain most extensively in central Highlands in the morning, patchier over tops east of the A9. Cloud bases tending to lift and break toward many tops.
<b>Chance of cloud free Munros?</b>	<b>70%</b>	<b>60%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Patchwork of sun, some high cloud builds from west, thickening later. Visibility very good.	Glimpses of sun through high cloud. Visibility mostly good.
<b>How Cold? (at 900m)</b>	5 to 8C. Feeling near freezing on tops in increasing wind.	8 to 10C.
<b>Freezing Level</b>	Above the summits	Above the summits

**Planning Outlook**

**All mountain areas of Britain from Wednesday, 8 May, 2024**

High pressure is nearby during the week ahead, but weak fronts drifting in from the Atlantic on southwesterly winds bring periods of rain and drizzle to western Scotland - the mountains often covered in cloud here. Drier with higher cloud bases toward the central and eastern Highlands. England and Wales mostly dry, isolated showers, hills often clear, light winds and mild or increasingly warm. Dry and warm for much of Britain to start the weekend with southerly breezes, but a greater risk of some rain or showers by Sunday. Showery conditions more likely into the start of next week with lower pressure likely.

**Forecast issued at 16:30 on Monday, 6 May, 2024**
