## General Summary for Tuesday, 23 April, 2024

### British Mountain Summary:

**Based on forecast chart for noon 23 April, 2024**

A cold northerly breeze - notable chill factor on the tops, particularly eastern areas. Feeling pleasant where sheltered in the sunshine, especially by afternoon, best in western Scotland. Most places dry all day, low risk of a brief light shower or flurry. Early showers clearing south across Wales.

### Headline for Peak District

Brisk chilly winds. Mostly dry, sun best in west.

## Detailed Forecast for Tuesday, 23 April, 2024

<b>How windy? (On the summits)</b>	North to northeasterly, 20 to 25mph, occasionally 30mph around higher tops, especially around north and east-facing edges.
<b>Effect of wind on you?</b>	<b>Considerable wind chill over higher terrain. Blustery on higher moors and near some edges, may affect comfortable walking.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Rare showers</b> Well scattered brief light showers coming in from the northeast.
<b>Cloud on the hills?</b>	<b>Mostly little, or soon clearing</b> Patches of cloud may graze higher tops in the morning, but all lifting above the hills.
<b>Chance of cloud free summits?</b>	<b>Soon above 90%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Broken cloud and sun. Visibility excellent.
<b>Temperature (at 600m)</b>	1C rising to 3 or 4C. Wind chill feeling sub-zero on tops, -5C in exposed spots, nearer -8C at first.
<b>And in the valleys</b>	3C rising to 9C.

**Peak District - Looking Ahead**

	<b>Wednesday 24 April</b>	<b>Thursday 25 April</b>
<b>How windy? (On the summits)</b>  <b>Effect of wind on you?</b>	Northerly 15 to 20mph, up to 25mph higher exposed areas, mainly toward the east.  <b>Fairly small effect on walking, blustery in places. Feeling chilly in the wind, but pleasant where sheltered in the sun.</b>	Northwesterly 15 to 20mph.  <b>Mostly small effect on walking, but still a noticeable chill where exposed on hills.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Rare showers</b> Chance of a brief flurry of soft hail or snow.	<b>Showers developing</b> A scattering of showers forming increasingly during the day, with possible hail.
<b>Cloud on the hills?</b>          <b>Chance of cloud free summits?</b>	<b>Little if any</b>          <b>90%</b>	<b>Generally clear</b>  Rare if any brief patches around some slopes early in day.          <b>90%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Broken cloud and sun. Visibility excellent.	Variable cloud and sun, best in morning. Visibility excellent.
<b>Temperature (at 600m)</b>  <b>And in the valleys</b>	1C rising to 4 to 6C afternoon. Wind chill feels near -5C at first, still near freezing by afternoon.  Slight frost in sheltered valleys at first. Max 9 to 12C, highest in west.	2C rising to 6C. Wind chill feeling like 0 to -3C, coldest in morning.  Near freezing some valleys at first. Rising to 10 to 12C.

**Planning Outlook**

**All mountain areas of Britain from Wednesday, 24 April, 2024**

Northerly breezes continue into midweek, feeling distinctly chilly over higher terrain - temperatures will fluctuate from below freezing in the morning, to a few degrees above into the afternoon for a few days - coldest toward the east and northeast. Sunny spells with excellent visibility, mixed with scattered brief showers or snow flurries. Lowering pressure Thursday into Friday, turning more widely showery again with hail and snow on some hills, but winds fairly light. A risk of a rain system spiraling across Britain over the weekend, upland snow for a time, accompanied by stronger east to southeasterly winds.
