## General Summary for Saturday, 4 May, 2024

### British Mountain Summary:

#### Based on forecast chart for noon 4 May, 2024

A broad and very slack area of low pressure will edge north bringing extensive low cloud and areas of drizzle, with again bursts of heavy, perhaps locally thundery rain, developing into Scotland. Best breaks in cloud and sun in the northwest Highlands, and clearer, brighter conditions developing for southern Wales.

### Headline for West Highlands

Drizzle and low cloud, best breaks in northwest. Heavy showers may develop.

## Detailed Forecast for Saturday, 4 May, 2024

<b>How windy? (On the Munros)</b>	Risk occasionally gusty easterly 20-25mph early in the day, otherwise often variable and low speeds 10-15mph or less.
<b>Effect of wind on you?</b>	<b>Mostly small, but risk of suddenly gusty locations on some slopes early in the day.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Drizzle/local rain, risk heavy showers forming.</b> Drizzly in hill fog, plus bursts of rain forming here and there, especially toward south. Mainly inland into afternoon, greater risk of heavy and possibly thundery bursts developing.
<b>Cloud on the hills?</b>	<b>Extensive low cloud, breaks north</b> Blanket fog from mid or some lower slopes upward Loch Lomond NP and southern sea lochs. Covering many tops, but higher and more broken cloud bases northwest into Lochaber, best toward Knoydart.
<b>Chance of cloud free Munros?</b>	<b>20%, to locally 50% northwest</b>
<b>Sunshine?</b> Air clarity (below cloud)	Little weak sun, mainly coast near Mull. General haze, murkier toward south.
<b>How Cold? (at 900m)</b>	7 or 8C, but locally 10C west of Loch Linnhe.
<b>Freezing Level</b>	Above the summits

## West Highlands - Looking Ahead

	Sunday 5 May	Monday 6 May
<b>How windy? (On the Munros)</b> <b>Effect of wind on you?</b>	Under a very slack cyclonic pattern, winds will vary markedly 5-10mph, at times calm. In and around showers, risk 25mph. <b>Small to negligible often through the day. Risk of sudden gusts within the vicinity of any heavy showers.</b>	Winds remaining slack and variable 5-10mph, but northerly down west coast 15mph. Risk local gusts 25mph inland. <b>Small, but scope for local sudden gusts of wind inland in and around any heavy, perhaps thundery, showers.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Drizzle, developing to heavy showers.</b> Pockets of drizzle from dawn here and there. Within an unstable environment, will develop into heavy showers; risk of thunderstorms. Coasts then mostly dry.	<b>Patchy rain, then heavy showers forming.</b> Patches of rain here and there in morning, but some areas dry. Will break up into scattered heavy showers inland and perhaps local thunderstorms in afternoon.
<b>Cloud on the hills?</b>	<b>Extensive, local breaks as bases slowly rise.</b> Within a humid environment, expect extensive hill fog through the day. Lowest bases in morning, before slow rise as convection builds, with local breaks.	<b>Extensive, best breaks coast afternoon.</b> Extensive banks of low cloud, shrouding hills from lower slopes up in morning. Slow rise in bases, with the best breaks developing for coastal hills afternoon.
<b>Chance of cloud free Munros?</b>	<b>20%</b>	<b>30%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Rare sunny glimpses, but may become occasional for coasts into afternoon. Hazy, and for periods in the morning murky. Best visibility coasts afternoon.	Mostly overcast with rare glimpses of sun. May become sunnier coasts afternoon. Hazy, with rather murky conditions, may improve to become good away from rain.
<b>How Cold? (at 900m)</b> <b>Freezing Level</b>	6 to 8C, warmest inland towards and into afternoon.  Above the summits	6 to 8C  Above the summits

## Planning Outlook

### All mountain areas of Britain from Sunday, 5 May, 2024

Slow-moving weather patterns continue through the Bank Holiday weekend as a weak zone of low pressure dominates over the British Isles. There will remain uncertainty of local day-to-day detail, but most likely the wind often light and temperatures generally mild, but less warm than midweek in western Scotland. Sunday into Monday, will see varied zones of heavy showers forming, local thunderstorms, but some places escaping often dry with the best sunny breaks for coastal areas as the convection builds inland. High pressure then tends to build from the west into midweek to bring a fair amount of dry weather, although rain bearing fronts may return to the northwest at times.
