General Summary for Saturday, 30 March, 2024

British Mountain Summary:
Based on forecast chart for noon 30 March, 2024
Showers, of hail and on higher areas snow, mainly west Wales and also Scottish Highlands where risk thunder. Otherwise the day will improve as southerly winds become fairly light and cloud base rises to clear many higher summits. The air will be very clear indeed.

Headline for Cairngorms NP and Monadhliath
Fairly light wind; heavy showers, risk thunder.

Detailed Forecast for Saturday, 30 March, 2024

How windy? (On the Munros)	Southerly; after dawn 20mph, perhaps 25mph. Will ease to 10 to 15mph by mid afternoon.
Effect of wind on you?	Becoming small
How wet? (Precipitation and its impact)	Heavy showers, mainly afternoon. Chance lightning. Morning: isolated pockets rain (or snow above 450m) but extensively dry. From about midday: changing to heavier hail showers; in some areas precipitation possibly then frequent. Small risk thunder.
Cloud on the hills?	Mostly clearing, but extensive at first After dawn: some summits cloud free, but many foggy,. Will markedly improve as cloud base rises. By late morning, cloud base widely above 900m, then intermittently clearing the tops particularly Monadhliath east to N Cairngorms/Lochnagar (lowering again in precipitation).
Chance of cloud free Munros?	Rising to 60% from midday
Sunshine? Air clarity (below cloud)	Patchwork of sunshine and excellent visibility, although visibility abruptly very poor in precipitation, especially snow.
How Cold? (at 900m)	-1 or 0C after dawn before reaching 3 to 5C mid afternoon, warmest Monadhliath/N Cairngorms.
Freezing Level	700 to 900m, rising to above the summits. Frost in many glens at dawn.

All mountain areas of Britain from Sunday, 31 March, 2024

Highland Scotland largely dry over the coming week, although often sub-freezing on higher slopes, and mainly toward the east patches of drizzle or light snow and low cloud. Sunshine intermittently western mountains. Elsewhere, intermittently wet and extensively cloudy. On higher slopes, the precipitation often as snow, possibly significant falls mid week. Across the country, into the week, easterly winds sometimes near gale.

The production of the Scottish forecasts is fully funded by the Scottish Government through Mountaineering Scotland with the support of sportscotland. Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service. 2024.
