Planning Outlook

All mountain areas of Britain from Wednesday, 24 April, 2024

Northerly breezes continue into midweek, feeling distinctly chilly over higher terrain - temperatures will fluctuate from below freezing in the morning, to a few degrees above into the afternoon for a few days - coldest toward the east and northeast. Sunny spells with excellent visibility, mixed with scattered brief showers or snow flurries. Lowering pressure Thursday into Friday, turning more widely showery again with hail and snow on some hills, but winds fairly light. A risk of a rain system spiraling across Britain over the weekend, upland snow for a time, accompanied by stronger east to southeasterly winds.
