General Summary for Thursday, 16 May, 2019

British Mountain Summary:

Based on forecast chart for noon 16 May, 2019

High pressure centred across Scandinavia will continue to dominate the weather bringing further fine, warm and sunny conditions to the hills, although cloud will bubble up through the day to produce a few localised afternoon showers; mainly to NW Scotland. Patches of low cloud some hills around dawn will soon disperse.

Headline for Brecon Beacons

Fine and sunny, although more cloud PM; small risk of a shower.

Detailed Forecast for Thursday, 16 May, 2019

How windy? (On the summits)	Easterly 15 to 20mph
Effect of wind on you?	Small.
How wet? (Precipitation and its impact)	Rain very unlikely Small risk of an isolated shower later in the afternoon or evening.
Cloud on the hills?	Very little if any
Chance of cloud free summits?	Greater than 90%
Sunshine? Air clarity (below cloud)	Sunshine, particularly morning, although cloud will tend to fill in afternoon. Very good or excellent visibility.
How Cold? (at 750m)	8C.
Freezing Level	Above the summits

Brecon Beacons - Looking Ahead

	Friday 17 May	Saturday 18 May
How windy? (On the summits)	Easterly 30mph.	Easterly 5-10mph.
Effect of wind on you?	Walking may well be impeded by the wind.	Negligible.
How wet? (Precipitation and its impact)	Bursts of rain Often dry; although patches of showery rain will move in from the east. One or two heavy bursts.	Showery bursts of rain. Low confidence: Bursts of showery rain will likely come and go through the day; particularly during the afternoon when there will be some heavy bursts.
Cloud on the hills?	Higher areas may be extensively foggy Low confidence: Fog may well shroud hills in east Wales extensively, in morning and also during and after rain, above about 300 or 400m. Otherwise breaks to 700m. In west Wales, patches of fog below 750m here and there, but most cloud confined to or above highest tops.	Fairly extensive, may clear some tops PM. Low confidence: Areas of low cloud will shroud the hills from dawn, most extensively across eastern areas. In the afternoon, bases are likely to lift between showers with some temporary breaks possible to higher tops.
Chance of cloud free summits?	40%	30%
Sunshine? Air clarity (below cloud)	Little or no sunshine. Very good or excellent visibility.	Mostly cloudy, rare glimpses of sun between showers. Visibility generally good or very good, but poor at times in rain.
How Cold? (at 750m)	6C.	7C
Freezing Level	Above the summits.	Above the summits.

Planning Outlook**All mountain areas of Britain from Friday, 17 May, 2019**

Easterly winds over the weekend will bring banks of cloud in off the North Sea, often breaking over western mountains. The remnants of rain over central Europe will reach Britain, bringing showers, occasionally heavy, and perhaps one or two areas of more persistent rain. Total rainfall generally small, particularly in Scotland. A slack pressure pattern into early next week with little wind and a mix of sunshine and scattered showers, some perhaps heavy. Marked uncertainty in the evolution from midweek onwards as to whether a dry northeasterly winds will develop or whether west winds will become established for a few days with some rain.

Forecast issued at 15:21 on Wednesday, 15 May, 2019

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Geoff Monk & Associates, 2019.
