General Summary for Wednesday, 12 June, 2019

British Mountain Summary:

Based on forecast chart for noon 12 June, 2019

A front will be pivoting slowly westwards across Britain, with low cloud, rain and drizzle affecting many areas through the day. Some heavy bursts, the most persistent rain concentrated on eastern hills. Largely dry toward NW Scotland. Cold & windy - gale force across tops in the Highlands much of day. Less windy Wales, S Pennines.

Headline for Peak District

Rain at times, risk heavy. Low cloud. Wind dropping.

Detailed Forecast for Wednesday, 12 June, 2019

How windy? (On the summits)	Northeasterly 20-25mph from dawn into early morning, but easing, direction becoming variable, less than 10mph at times midday into afternoon.
Effect of wind on you?	Becoming small.
How wet? (Precipitation and its impact)	Rain on and off; risk turning very wet again PM. Some uncertainty: Areas of rain or drizzle from dawn may persist for a few hours, tending to break up, but may leave lingering patches of rain. A few hours in middle of day may become substantially dry. A risk of heavy rain coming back in from the east during afternoon, small chance thundery locally.
Cloud on the hills?	Covering many tops much of day During rain, cloud shrouding the hills, at times to low levels. Occasional breaks forming to higher tops middle of day, typically best west of Kinder/Bleaklow plateaus.
Chance of cloud free summits?	30%
Sunshine? Air clarity (below cloud)	Occasional brief glimpses of sun, mainly western areas afternoon. Visibility poor during rain, at times becoming good.
Temperature (at 600m)	7C rising to 10C afternoon.
And in the valleys	11C rising to 16C away from rain afternoon.

Peak District - Looking Ahead

	Thursday 13 June	Friday 14 June
How windy? (On the summits) Effect of wind on you?	Low confidence in the forecast detail: Direction variable, may become westerly, 15 to 30mph, local lulls. Expect buffeting and wind chill across the hills throughout the day; may become small for periods.	Confidence of detail remains low: South to southwesterly, 15-25mph. Fairly small, but may impede walking on tops much of day.
How wet? (Precipitation and its impact)	Frequent heavy rain, threat thunderstorms Detail uncertain: A zone of rain or showers is likely to pivot across northern England. Risk of slow-moving torrential downpours forming with thunder and lightning.	Threat thundery downpours Detail very uncertain, but strong likelihood of clusters of showers, in places some torrential downpours forming (mainly PM) with risk of hail, thunder and lightning.
Cloud on the hills?	Likely extensive on tops Often covering higher terrain, brief breaks to 600m, but ragged patches suddenly dropping to lower slopes during and after rain.	Mostly around rain Varied, breaks at times to highest summits, but ragged banks of cloud lowering suddenly during and after rain to form on lower slopes.
Chance of cloud free summits?	40%	60%
Sunshine? Air clarity (below cloud)	Rare if any glimpses of sun. Visibility often poor due to rain.	Brief glimpses of sun, mostly cloudy. Visibility good away from rain, but some areas often poor.
Temperature (at 600m) And in the valleys	7 to 9C. Up to 16C away from rain, but often nearer 10 to 12C.	7 to 10C. 15 to 18C, warmest eastern valleys.

Planning Outlook**All mountain areas of Britain from Thursday, 13 June, 2019**

Low pressure will dominate for the rest of this week into the weekend, maintaining unsettled conditions across the British Isles. Periods of rain and some heavy downpours with possible thunder and lightning. Temperatures generally cool, and winds often brisk across the hills. Day-to-day forecast detail will stay very uncertain, with occasional windows of drier weather possible locally. Into next week, generally warmer with winds from the south/southwest. Some hints of pressure building at least for a time to give drier weather.
