General Summary for Monday, 15 April, 2019

British Mountain Summary:

Based on forecast chart for noon 15 April, 2019

Gale force southeasterly winds across all regions, giving significant wind chill across the hills. Powerful gusts to lower slopes. Most places dry and cloud above hills. Local showers and possible low cloud SE Scotland. Patchy rain also encroaching into Wales from southwest.

Headline for Snowdonia National Park

Cold, severe gales; very gusty. Largely dry, some low cloud.

Detailed Forecast for Monday, 15 April, 2019

How windy? (On the summits)	Southeasterly 40 to 50mph, locally risk 55-60mph western mountains.
Effect of wind on you?	Walking arduous or difficult on higher areas. Local sudden gusts lower slopes northwest of major ridges. Significant wind chill.
How wet? (Precipitation and its impact)	Rain very unlikely Most or all day largely dry. A little rain may encroach onto west coastal hills later in day.
Cloud on the hills?	Very little Fragments on highest tops for a few hours after dawn, with possible patches lower slopes. Generally clearing.
Chance of cloud free summits?	80%
Sunshine? Air clarity (below cloud)	Areas of sunshine although cloud will sometimes be extensive. Very good visibility although a haze.
How Cold? (at 900m)	-1C rising to 3C. Where directly exposed to wind, feeling close to -15C.
Freezing Level	700m post dawn; rising above the summits by midday. Local eastern valleys after dawn.

Snowdonia National Park - Looking Ahead

	Tuesday 16 April	Wednesday 17 April
How windy? (On the summits)	Confidence low in this forecast: Easterly 15 to 25mph, or at times less.	Easterly, 10 to 20mph.
Effect of wind on you?	Fairly small.	Fairly small. Cool in exposure early in day.
How wet? (Precipitation and its impact)	Rain on and off Rain intermittently through much of, or perhaps throughout daylight, edging slowly north/eastwards. Local heavier bursts possible.	Rain unlikely
Cloud on the hills?	Very extensive Fog may well have enveloped the hills widely above 600m. Patches may for a few hours form on some lower slopes. Away from rain, some breaks forming.	Mostly all clearing Patches of low cloud covering some hills in morning, focused on east Wales, but likely to lift and break to higher tops.
Chance of cloud free summits?	30%	70%
Sunshine? Air clarity (below cloud)	Sunshine may later come through west Wales. Hazy; visibility deteriorating further in rain.	Sunshine may be weak at times due to high level cloud. A general haze.
How Cold? (at 900m)	3C.	5C rising to 7C.
Freezing Level	Above the summits.	Above the summits.

Planning Outlook**All mountain areas of Britain from Tuesday, 16 April, 2019**

High pressure stays positioned to the east, and a general southeasterly flow will prevail toward the Easter period. Temperatures will tend to rise through the week ahead. Substantially dry conditions, although on Tuesday a little rain or sleet is possible. Some low cloud, focused on eastern hills. Winds often brisk, in places gusty to lower slopes. The ground very dry underfoot - beware of grass fires. Snow patches on higher tops, mainly Lakes and Scottish Highlands.
