## General Summary for Thursday, 16 May, 2019

### British Mountain Summary:

**Based on forecast chart for noon 16 May, 2019**

High pressure centred across Scandinavia will continue to dominate the weather bringing further fine, warm and sunny conditions to the hills, although cloud will bubble up through the day to produce a few localised afternoon showers; mainly to NW Scotland. Patches of low cloud some hills around dawn will soon disperse.

### Headline for Southeastern Highlands

Patchy cloud clearing. Then largely fine with sunshine. Locally gusty.

## Detailed Forecast for Thursday, 16 May, 2019

<b>How windy? (On the Munros)</b>	Southeasterly 15 to locally 25mph
<b>Effect of wind on you?</b>	<b>Mostly small, but will impede ease of walking northwest of major summits. Local sudden gusts lower slopes.</b>
<b>How wet? (Precipitation and its impact)</b>	<b>No rain expected</b>
<b>Cloud on the hills?</b>	<b>Early fog patches soon clearing.</b> Areas of fog may have formed overnight on some slopes, possibly widely above eastern valleys. However, this fog will break up and clear by mid/late morning. Then hills widely clear.
<b>Chance of cloud free Munros?</b>	<b>Soon lifting to 90%</b>
<b>Sunshine? Air clarity (below cloud)</b>	Sunshine, although cloud will develop from late morning. Excellent visibility.
<b>How Cold? (at 900m)</b>	Between 5 and 10C, coldest east of A9 and summits south from about Loch Tay in morning.
<b>Freezing Level</b>	Above the summits
