General Summary for Wednesday, 12 June, 2019

British Mountain Summary:

Based on forecast chart for noon 12 June, 2019

A front will be pivoting slowly westwards across Britain, with low cloud, rain and drizzle affecting many areas through the day. Some heavy bursts, the most persistent rain concentrated on eastern hills. Largely dry toward NW Scotland. Cold & windy - gale force across tops in the Highlands much of day. Less windy Wales, S Pennines.

Headline for Yorkshire Dales and North Pennines

Strongest winds easing; rain/drizzle and low cloud.

Detailed Forecast for Wednesday, 12 June, 2019

How windy? (On the summits)	Northeasterly, 30 to 40mph from dawn, strongest N Pennines. Tending to drop through morning, perhaps markedly across southern fells in Yorks Dales, to 15-20mph or less PM.
Effect of wind on you?	Very blustery many higher tops in morning, and may impede walking North Pennines much of the day. Easing across the Dales. Feeling cool for June.
How wet? (Precipitation and its impact)	Rain or drizzle, fairly persistent much of Pennines. Rain or drizzle likely come and go much of the day, especially eastern Yorks Dales and North Pennines. Risk fairly persistent and heavy for a few hours, mainly morning. Toward Ingleborough, a few hours through middle of day into afternoon may become largely dry. Risk heavy rain filling in again before dusk.
Cloud on the hills?	Extensive across many hills through day. Shrouding the Pennines much of the day, at times extensive fog from lower slopes upward, especially around rain and toward east. Some cloud breaks forming away from rain toward western Dales, may only rarely lift to higher tops.
Chance of cloud free summits?	20%, or 40% western Dales PM.
Sunshine? Air clarity (below cloud)	Rare if any glimpses of sun. Visibility poor where rain persists, occasionally improving.
How Cold? (at 700m)	6 to 8C, may rise a degree or so higher south/west Yorks Dales afternoon. Feeling sub-zero where exposed to strongest wind, locally -5C higher Pennines at first.
And in the valleys	During rain, 10C or lower, coolest eastern valleys; may reach 16C into afternoon west and southern Dales.

Yorkshire Dales and North Pennines - Looking Ahead

	Thursday 13 June	Friday 14 June
How windy? (On the summits)	Low confidence in the forecast detail: Direction variable, 15 to 30mph, local lulls.	Confidence of detail remains low: South to southwesterly, 20-30mph.
Effect of wind on you?	Expect buffeting and wind chill across the hills throughout the day; may become small for periods.	Blustery conditions on the fells much of day.
How wet? (Precipitation and its impact)	Frequent heavy rain, threat thunderstorms Detail uncertain: A zone of rain or showers is likely to pivot across northern England. Risk of slow-moving torrential downpours forming with thunder and lightning.	Threat thundery downpours Detail very uncertain, but strong likelihood of clusters of showers, in places some torrential downpours forming (mainly PM) with risk of hail, thunder and lightning.
Cloud on the hills?	Likely extensive Covering most higher fells all day, but ragged patches suddenly dropping to lower slopes during and after rain.	Often covering tops Varied, often capping higher tops, but ragged banks of cloud lowering suddenly during and after rain to form on lower slopes.
Chance of cloud free summits?	30%	50%
Sunshine? Air clarity (below cloud)	Rare if any glimpses of sun. Visibility often poor due to rain.	Brief glimpses of sun, mostly cloudy. Visibility good away from rain, but some areas often poor.
How Cold? (at 700m)	6 to 8C.	6 to 8C.
And in the valleys	Up to 16C away from rain, but often nearer 10 to 12C.	14 to 17C, warmest eastern dales.

Planning Outlook**All mountain areas of Britain from Thursday, 13 June, 2019**

Low pressure will dominate for the rest of this week into the weekend, maintaining unsettled conditions across the British Isles. Periods of rain and some heavy downpours with possible thunder and lightning. Temperatures generally cool, and winds often brisk across the hills. Day-to-day forecast detail will stay very uncertain, with occasional windows of drier weather possible locally. Into next week, generally warmer with winds from the south/southwest. Some hints of pressure building at least for a time to give drier weather.

Forecast issued at 16:35 on Tuesday, 11 June, 2019

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Geoff Monk & Associates, 2019.
