General Summary for Sunday, 13 August, 2017

British Mountain Summary:
Based on forecast chart for noon 13 August, 2017

A transient ridge of high pressure will cross the UK during the day. There will be a few showers over Scottish highlands and here cloud will persist on higher western summits. Elsewhere, hills largely cloud free, patches of sun and light and.

Headline for Brecon Beacons

Largely dry and cloud free

Detailed Forecast for Sunday, 13 August, 2017

| | |
|--------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| How windy? (On the summits) | Variable in direction, 10mph or less. Becoming southerly 15mph during evening. |
| Effect of wind on you? | Negligible until evening |
| How wet? | Rain not expected Dry most of the day. Small risk of bursts of rain extending eastwards from dusk. |
| Cloud on the hills? | Very little until late in the day Any early low cloud or valley fog will soon lift and disperse to leave all hills clear of cloud by late morning. However, from late afternoon, and more especially into the evening, cloud will gradually lower onto the hills to the south of Brecon. |
| Chance of cloud free summits? | 60% |
| Sunshine and air clarity? | Occasional sunshine and very good visibilities. |
| How Cold? (at 750m) | 10C |
| Freezing Level | Above the summits |

Brecon Beacons - Looking Ahead

| | Monday 14 August | Tuesday 15 August |
|--------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| How windy? (On the summits) | Southerly 15-20mph, locally 25mph higher peaks. | Southwest veering westerly: 15-25mph |
| Effect of wind on you? | Mostly small | Mainly small |
| How wet? | Often dry, but risk of rain for a few hours Risk of a few hours of patchy rain during the morning, mainly across western hills. However, this will likely clear for the afternoon, before returning again evening. | Showers, perhaps longer spells of rain Showery rain on and off for much of the day, heaviest and most persistent Brecon Beacons. Perhaps becoming drier towards evening from the west. |
| Cloud on the hills? | Fairly extensive Tops mainly shrouded in cloud in rain, although may clear intermittently during the afternoon. | Extensive morning tending to break later Most if not all hill shrouded in cloud in the morning. Bases tending to lift and break from the west afternoon outside showers/rain. |
| Chance of cloud free summits? | 20% | 40% |
| Sunshine and air clarity? | Glimpses of hazy sun possible during afternoon, otherwise little if any sunshine. Visibility intermittently good away from rain and hill fog, but noticeable slight haze. | Fairly extensive poor visibility in hill fog morning. Glimpses of sunshine by afternoon with very good visibility developing. |
| How Cold? (at 750m) | 11-12C | 10 to 12C |
| Freezing Level | Above the summits | Above summits |

Planning Outlook**All mountain areas of Britain from Monday, 14 August, 2017**

A continuation of the current unsettled weather pattern through next week with southwesterly winds bringing bands of low cloud and rain countrywide, although a transient ridge of high pressure will result in an improvement in conditions on Tuesday. From midweek onwards, increasing threat of upland gales and on western mountains heavy rain with areas of low pressure passing close by the UK.

Forecast issued at 7:27 on Sunday, 13 August, 2017

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Geoff Monk & Associates, 2017.
