General Summary for Friday, 14 September, 2018

British Mountain Summary:

Based on forecast chart for noon 14 September, 2018

Windy, particularly morning Scottish Highlands. A weak front will continue to lie across central Britain, bringing bursts of rain, and very extensive low cloud - this giving fog on many lower west coastal slopes. Colder and showery N Scotland, risk thunder. Wet snow highest tops.

Headline for Brecon Beacons

Blustery. Cloud covering most higher tops. Patches drizzly rain.

Detailed Forecast for Friday, 14 September, 2018

How windy? (On the summits)	West to southwesterly, 25mph.
Effect of wind on you?	Fairly small.
How wet? (Precipitation and its impact)	Patchy rain, mainly west Wales A little rain from time to time, mostly on hills near/west of Brecon. Only a few bursts of rain easternmost Wales.
Cloud on the hills?	Extensive on higher areas Cloud will frequently shroud areas above 550m, although will lift toward 750m at times. In rain, patches likely nearer 400m. In east Wales (Black Mountains northwards), most cloud above the summits.
Chance of cloud free summits?	40%
Sunshine? Air clarity (below cloud)	Occasional sun mostly eastern valleys. Visibility reduced by rain, but often very good or excellent east Wales.
How Cold? (at 750m)	8C
Freezing Level	Above the summits.

Brecon Beacons - Looking Ahead

	Saturday 15 September	Sunday 16 September
How windy? (On the summits) Effect of wind on you?	West backing southwesterly 20 to perhaps 25mph. Will begin to strengthen in the evening. Fairly small.	Southwesterly typically 40mph. Walking widely difficult on higher areas.
How wet? (Precipitation and its impact)	Little or no rain Small threat of one or two drizzly showers.	Rain on and off Confidence low: Drizzle on and off and possibly intermittently heavier rain west Wales and perhaps Brecon Beacons. Elsewhere, rain only occasionally - possibly dry easternmost Wales.
Cloud on the hills? Chance of cloud free summits?	Very little Patches on higher tops after dawn are soon likely to lift above the summits. Possibly fog reforming higher areas toward evening. 80%	Very extensive Fog across the hills, widely from lower slopes up west Wales and Brecon Beacons. Summits may intermittently or frequently clear east Wales. 30%
Sunshine? Air clarity (below cloud)	Sunshine, most widely east Wales, although there may be extensive high level cloud. Very good or excellent visibility.	Sunshine occasionally east Wales. Hazy.
How Cold? (at 750m) Freezing Level	10C. Above the summits.	12C. Above the summits.

Planning Outlook**All mountain areas of Britain from Saturday, 15 September, 2018**

Frequently windy, wet with extensive low cloud, with the worst conditions focussed on western mountains - for the next week to ten days. Risk around Tuesday of stormy very wet weather although the timing and track of the worst conditions is very uncertain.

Forecast issued at 14:45 on Thursday, 13 September, 2018

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Geoff Monk & Associates, 2018.
