General Summary for Friday, 9 November, 2018

British Mountain Summary:

Based on forecast chart for noon 9 November, 2018

Windy; widespread upland gales Scottish Highlands. Overall extensive fog higher areas, and patches of rain will drift northwards. Through afternoon Wales, and after dusk elsewhere, deteriorating conditions as storm force winds and heavy rain spread north-eastwards.

Headline for Peak District and Yorkshire Dales

Upland wind near gale; occasional rain. Persistent fog.

Detailed Forecast for Friday, 9 November, 2018

How windy? (On the summits)	South or southeasterly, 30 to 35mph. Will strengthen to 60mph after dusk.
Effect of wind on you?	Arduous walking where exposed on higher areas.
How wet? (Precipitation and its impact)	Rain occasionally Pockets of fine drizzle and during afternoon patches of light rain; total rainfall small.
Cloud on the hills?	Cloud covering higher tops all day. Cloud covering the hills extensively from lower slopes morning. The base will tend to rise slowly in afternoon still leaving patches below 450m bit breaks to 550m, perhaps 700m.
Chance of cloud free summits?	Almost nil, rising to 40%
Sunshine? Air clarity (below cloud)	Little if any sun. Persistent haze.
Temperature (at 600m)	5C
And in the valleys	10C.

Peak District and Yorkshire Dales - Looking Ahead

	Saturday 10 November	Sunday 11 November
How windy? (On the summits)	Southwesterly typically 25mph, but up to 35mph at and just after dawn.	Southerly 20 to 25mph.
Effect of wind on you?	Walking arduous and wind chill significant at dawn, but will become fairly small.	Fairly small.
How wet? (Precipitation and its impact)	Frequent showers, mainly Yorkshire Yorkshire Dales NP: Showers throughout the day; sometimes frequent with the rain almost constant for a couple of hours; risk thunder. South of Skipton: Showers generally isolated, although even here the risk for an hour or so of frequent rain.	Risk showers Frequently dry, although a few showers or possibly over an hour or two, frequent precipitation.
Cloud on the hills?	Shrouding higher tops in the Dales Cloud often shrouding higher tops in the Dales through the day, with some patches to 450m in the west near showers. South from Skipton, and across the Peak District, hills mainly clear of cloud.	Intermittently covering higher tops Cloud base typically 650 to 800m, but will drop to 400 to 550m at times near rain.
Chance of cloud free summits?	20% the Dales, 70% Peak District.	70%
Sunshine? Air clarity (below cloud)	Bursts of sunshine, most widely across the Peak District. Visibility generally very good.	Sunshine intermittently. Visibility often excellent.
Temperature (at 600m)	5C	6C
And in the valleys	8 to 10C	Will reach around 11C in the afternoon.

Planning Outlook**All mountain areas of Britain from Saturday, 10 November, 2018**

Winds almost constantly southerly over the next week to ten days will mean only higher summits in Scotland occasionally below freezing point. Rain at some stage most days (although probably drier from mid-week next week). Often windy and fog will frequently shroud the summits - and at times even lower slopes. Generally least rainfall and often little low cloud NW Highlands.

Forecast issued at 7:33 on Friday, 9 November, 2018
