General Summary for Saturday, 12 January, 2019

**British Mountain Summary:
 Based on forecast chart for noon 12 January, 2019**

A windy day across all hills with strong to gale force westerly winds resulting in significant chill. Extensive low cloud across many hills, highest bases and best breaks across eastern areas. Patches of drizzly rain; these frequent and later heavy across western Scotland.

Headline for Peak District and Yorkshire Dales

Windy with drizzly showers. Extensive hill fog, bases lowering PM.

Detailed Forecast for Saturday, 12 January, 2019

How windy? (On the summits)	Westerly 30 to 45mph
Effect of wind on you?	Walking arduous or perhaps difficult, and wind chill significant, where exposed on higher areas.
How wet? (Precipitation and its impact)	Drizzly showers most of the day Drizzly showers will become increasingly frequent through the day, although total rainfall small eastern dales.
Cloud on the hills?	Extensive much of region Through morning, cloud fairly extensive across higher areas above 500-700m. Some local breaks, especially in the south and east. During the afternoon, bases will lower to 200-500m; lowest western Dales.
Chance of cloud free summits?	30%
Sunshine? Air clarity (below cloud)	Glimpses of sun here and there eastern dales. Visibility intermittently reduced by rain.
Temperature (at 600m)	5C. Feeling closer to -7C in direct exposure to the wind.
And in the valleys	7 to 9C

Peak District and Yorkshire Dales - Looking Ahead

	Sunday 13 January	Monday 14 January
How windy? (On the summits)	West to northwest, 40 to 50mph, risk 60mph for a few hours.	Low confidence in detail of forecast: Northwesterly 20-25mph, but risk 30-35mph for a few hours around dawn.
Effect of wind on you?	Walking arduous or at times difficult across higher areas with significant wind chill.	Will impede walking for a few hours around dawn with significant wind chill.
How wet? (Precipitation and its impact)	Isolated rain/showers A few isolated patches of drizzle in morning, these will tend to clear to leave the odd shower in the afternoon.	Isolated showers Isolated, brief, showers through the day, mainly western hills.
Cloud on the hills?	Extensive, lifting and breaking by afternoon Extensive low cloud from dawn, down to lower slopes across west Dales. Will tend to lift and break toward midday, and by afternoon becoming confined to highest tops.	Mostly very little A few patches will come and go across the highest tops, mainly in the morning. Otherwise, most hills free of hill fog.
Chance of cloud free summits?	50%	70%
Sunshine? Air clarity (below cloud)	A few glimpses of the sun developing. Visibility fairly poor at first, but improving.	Occasional sunshine, becoming cloudier later. Visibility very good or excellent.
Temperature (at 600m)	4 or 5C	-1C lifting to 2C
And in the valleys	7 to 9C	2 to 5C, highest near west coast.

Planning Outlook**All mountain areas of Britain from Sunday, 13 January, 2019**

A gradual change into next week as a broad band of generally westerly winds becomes established. Precipitation will fall, mainly on western mountains, as fronts come through and upland gales will be frequent, particularly Scottish Highlands. Temperature wise, a more typical range with freeze thaw cycles on the Scottish Highlands, allowing some accumulation of snow on the Munros. Elsewhere, higher summits occasionally below freezing point, but lying snow, if any, transient.
