General Summary for Friday, 13 July, 2018

British Mountain Summary:
Based on forecast chart for noon 13 July, 2018

A fairly humid day with little wind. Isolated patches of rain or drizzle in the morning will develop into scattered showers by afternoon. These will be heaviest from southern Scotland southwards with some isolated thunderstorms. Areas of low cloud in the morning will lift to higher tops into the afternoon. Best conditions in the northwest Highlands.

Headline for Snowdonia National Park

Fairly humid, little wind. Cloud lifting to high tops. Showers developing.

Detailed Forecast for Friday, 13 July, 2018

How windy? (On the summits)	Direction variable, little wind much of day. Locally gusty around showers.
Effect of wind on you?	Mostly negligible
How wet? (Precipitation and its impact)	Chance of a thunderstorm A few drizzly outbreaks or even a local burst of rain possible from early morning, but many places often dry. Increasing threat of local heavy showers or thunderstorms afternoon/evening.
Cloud on the hills?	Mostly very little Patches of cloud on some hills, and local mist in valleys post-dawn. Fragments becoming confined above 700-900m, and soon clearing to higher tops. However, patches will reform to lower slopes in rain.
Chance of cloud free summits?	60%
Sunshine? Air clarity (below cloud)	Occasional sunshine breaking through, sunniest near coast in afternoon. Visibility typically very good; locally murky early in day.
How Cold? (at 900m)	13 to 15C, quite humid.
Freezing Level	Above the summits

Snowdonia National Park - Looking Ahead

	Saturday 14 July	Sunday 15 July
How windy? (On the summits)	Westerly around 10mph.	West to southwest 10-15mph; highest along coastal hills.
Effect of wind on you?	Mostly negligible	Small
How wet? (Precipitation and its impact)	Isolated, if any, showers Very likely dry all day. However, small risk of an isolated shower developing into the afternoon.	Rain unlikely Small risk of rare patches of light rain or drizzle across western hills.
Cloud on the hills?	Very little A few patches of cloud will cap higher tops at times; mainly in the morning.	Low cloud lifting to higher tops in west. Banks of low cloud from dawn, mainly across western hills, will lift and generally clear by midday. However, a few patches may continue to come and go across the highest tops in the west.
Chance of cloud free summits?	80%	60%
Sunshine? Air clarity (below cloud)	Periods of sunshine. Visibility generally very good.	Occasional sunshine breaking through, mainly across eastern hills. Visibility generally very good.
How Cold? (at 900m)	13C	13C
Freezing Level	Above the summits	Above the summits

Planning Outlook**All mountain areas of Britain from Saturday, 14 July, 2018**

Over the weekend, weak fronts to edge east across Scotland bringing a little drizzly rain and low cloud; mainly across western hills. It will remain largely dry and warm across England and Wales with occasional sunshine. A fairly slack pressure pattern into the start of next week, and with a warm and quite humid airmass in place, showers will develop; these locally thundery, and perhaps more widespread later in the week. Areas of low cloud will shroud the hills at times.
