## General Summary for Monday, 14 August, 2017

### British Mountain Summary:

**Based on forecast chart for noon 14 August, 2017**

Extensive rain and low cloud associated with a shallow area of low pressure will affect particularly western mountains. The rain will be intermittent and low cloud patchy on the Pennines and also E & N Scotland.

### Headline for Southeastern Highlands

Windy. Rain frequently; extensive fog, particularly near/west of A9.

## Detailed Forecast for Monday, 14 August, 2017

<b>How windy? (On the Munros)</b>	Southerly 20-30mph, may reach 35at times afternoon and evening.
<b>Effect of wind on you?</b>	<b>Walking becoming arduous across higher areas by afternoon.</b>
<b>How wet?</b>	<b>Rain setting in</b> After a dry start, rain will spread up from the south by late morning, and then continue throughout much of the day. Breaks in the rain will be mostly east of the A9; least rain Angus
<b>Cloud on the hills?</b>	<b>Becoming extensive</b> Conditions will deteriorate from the south from dawn, with cloud lowering and becoming extensive, with bases on hills near the central belt from lower slopes upwards. Near and east of Glenshee, most cloud will be above 750-900m.
<b>Chance of cloud free Munros?</b>	<b>10%</b>
<b>Sunshine and air clarity?</b>	Sunshine rare if any.  Visibility frequently poor in the rain.
<b>How Cold? (at 900m)</b>	7 rising to 9C
<b>Freezing Level</b>	Above the summits

## Southeastern Highlands - Looking Ahead

	<b>Tuesday 15 August</b>	<b>Wednesday 16 August</b>
<b>How windy? (On the Munros)</b>	Southwest veering westerly: 20-25mph	Morning: west backing southerly 15-25mph. Then progressively strengthening to 35 to perhaps 50mph evening.
<b>Effect of wind on you?</b>	<b>Mostly fairly small</b>	<b>Walking increasingly difficult where exposed afternoon and evening, mainly higher slopes. Sudden gusts some lower slopes.</b>
<b>How wet?</b>	<b>Rain on and off</b> Showery rain on and off. The rain will vary from occasional brief showers to perhaps over an hour or two frequent rain - this most likely near and west of the A9.	<b>Rain spreading east later in day</b> Dry morning. Through afternoon rain spreading eastwards: the rain may well rarely cease areas west of A9; least rain Angus.
<b>Cloud on the hills?</b>	<b>Extensive, but base lifting</b>  Most if not all hills shrouded in cloud morning. Bases will lift toward 900 to 1100m, highest east of the A9. However, expect cloud to lower back to 600 to 800m near rain.	<b>Deteriorating: becoming extensive</b>  Cloud base rising through morning to clear most or all summits. But will deteriorate as rain approaches. Cloud will become persistent from many lower slopes up west of A9, but near and east of Glenshee mostly remaining above 700m.
<b>Chance of cloud free Munros?</b>	<b>50%</b>	<b>40%</b>
<b>Sunshine and air clarity?</b>	Occasional sunshine only. Very good or excellent visibility, but expect poor visibility in rain.	Occasional sun morning before high level cloud thickens to cut out the sun. Haze will gradually increase afternoon; poor visibility in rain.
<b>How Cold? (at 900m)</b>	7 rising to 10C	8C.
<b>Freezing Level</b>	Above summits	Above the summits.

**Planning Outlook****All mountain areas of Britain from Tuesday, 15 August, 2017**

Generally westerly winds over the coming week will bring further rain and areas of low cloud, particularly to western mountains. It will become very windy, particularly on western mountains on Wednesday where rain will be particularly extensive.

**Forecast issued at 16:26 on Sunday, 13 August, 2017**

The production of the Scottish forecasts is fully funded by the Scottish Government through the Mountaineering Council of Scotland with the support of sportscotland. Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Geoff Monk & Associates, 2017.
