### General Summary for Monday, 21 May, 2018

#### British Mountain Summary:

Based on forecast chart for noon 21 May, 2018

A slow-moving front will bring extensive low cloud and rain across northwest Scotland; heaviest coastal areas and later snow over highest tops in far northwest. Drier further east with hazy sun coming through for a time. Across England and Wales; warm with fairly extensive sun; although risk of isolated heavy showers/thunderstorms later.

#### Headline for Southeastern Highlands

Patchy rain clearing; then largely dry with some weak sun. Risk showers.

### Detailed Forecast for Monday, 21 May, 2018

<b>How windy? (On the Munros)</b>	South or southeasterly 20 to 30mph around dawn; soon easing to 10-15mph. Direction varying in the afternoon; may become northerly later.
<b>Effect of wind on you?</b>	<b>May impede walking across higher areas for a time after dawn. However, soon becoming small.</b>
<b>How wet?</b>	<b>A little rain; but often dry</b> Band of persistent rain over NW Highlands may occasionally bring rain west of A9, mainly morning and amounts small. East of A9, risk of the odd burst of rain later in the afternoon onwards.
<b>Cloud on the hills?</b>	<b>Summits frequently cloud free</b> After dawn, fog will likely shroud hills west of A9 and risk of a few patches on lower slopes Angus. This should all clear during morning. Thereafter, a few patches will form on higher slopes near showers.
<b>Chance of cloud free Munros?</b>	<b>80%</b>
<b>Sunshine and air clarity?</b>	Hazy sun through high level cloud. Visibility suppressed somewhat due to marked haze.
<b>How Cold? (at 900m)</b>	7 to 10C
<b>Freezing Level</b>	Above the summits.

## Southeastern Highlands - Looking Ahead

	<b>Tuesday 22 May</b>	<b>Wednesday 23 May</b>
<b>How windy? (On the Munros)</b>	East or northeasterly 10 to 20mph.	Southeasterly 10-15mph
<b>Effect of wind on you?</b>	<b>Small</b>	<b>Small</b>
<b>How wet?</b>	<b>Rain unlikely</b>	<b>No rain expected</b>
<b>Cloud on the hills?</b>	<b>Mostly very little</b>  Most summits cloud free, although in the morning, higher tops, particularly east of the A9 may be intermittently covered..	<b>Soon clearing</b>  Patches of cloud above 700-900m from dawn will soon lift and break to leave all hills clear by mid to late morning.
<b>Chance of cloud free Munros?</b>	<b>70%</b>	<b>70%</b>
<b>Sunshine and air clarity?</b>	Occasional sunshine. Probable haze.	A patchwork of sunshine.  Visibility good; but marked haze.
<b>How Cold? (at 900m)</b>	8C.	4C at dawn; soon rising to between 7-9C; highest in west.
<b>Freezing Level</b>	Above the summits.	Above the summits

**Planning Outlook****All mountain areas of Britain from Tuesday, 22 May, 2018**

Extensively fine, often sunny with cloud rarely covering the hills over the next 7 to 10 days. However, in the afternoons, isolated thunderstorms are likely on some days, mainly England and Wales and later in the week as eastern winds set in, fog will intermittently envelop eastern hills.

In Scotland, despite sustained snow melt some higher routes will remain blocked by snow for some days yet.

**Forecast issued at 15:55 on Sunday, 20 May, 2018**
