## General Summary for Monday, 20 September, 2021

### British Mountain Summary:

**Based on forecast chart for noon 20 September, 2021**

Low cloud and generally damp conditions will affect western Scotland. Total rainfall small, although some steadier rain will develop as a front moves in. SW'ly winds strongest in the far north. Elsewhere a fine day with broken cloud and sun, some early fog patches.

### Headline for Brecon Beacons

Dry, hills generally clear, sunshine.

## Detailed Forecast for Monday, 20 September, 2021

<b>How windy? (On the summits)</b>	Northerly 10 to locally 15mph.
<b>Effect of wind on you?</b>	Small
<b>How wet? (Precipitation and its impact)</b>	No rain
<b>Cloud on the hills?</b>	<b>Little if any</b> Most cloud confined above higher tops. Some early fog banks in valleys.
<b>Chance of cloud free summits?</b>	<b>90%</b>
<b>Sunshine? Air clarity (below cloud)</b>	Sunshine and a little fair-weather cloud forming. Mostly excellent visibility; early low level fog.
<b>How Cold? (at 750m)</b>	9C
<b>Freezing Level</b>	Above the summits.

## Brecon Beacons - Looking Ahead

	<b>Tuesday 21 September</b>	<b>Wednesday 22 September</b>
<b>How windy? (On the summits)</b>	Northwest becoming westerly, 10mph.	Southwesterly, 20 to 30mph, but may reach 40mph for a few hours on higher tops.
<b>Effect of wind on you?</b>	<b>Negligible</b>	<b>Expect blustery conditions throughout the day, walking sometimes arduous on higher tops and feeling cool where exposed.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Rain not expected</b>	<b>Little or no rain</b> Much of the day likely dry in south and east Wales. Chance of patchy light rain developing on western hills as a front approaches from the northwest.
<b>Cloud on the hills?</b>	<b>Generally clear</b>  Chance of fog banks near west coast for a time, also in some valleys inland after dawn.	<b>Patchy low cloud mostly west Wales</b>  Some banks of cloud focused on western Cambrian and Preseli hills, but very patchy elsewhere with most eastern summits clear.
<b>Chance of cloud free summits?</b>	<b>90%</b>	<b>40% west, to 70% east.</b>
<b>Sunshine?</b> Air clarity (below cloud)	Sunshine and high level cloud. Visibility good, but a slight haze.	Occasional sun, mostly east Wales. Visibility good below cloud, but west coasts may become misty.
<b>How Cold? (at 750m)</b>	12C; hills warmer than valleys at first.	10 to 12C.
<b>Freezing Level</b>	Above the summits	Above the summits

**Planning Outlook****All mountain areas of Britain from Tuesday, 21 September, 2021**

High pressure will drift southwards and southwesterly winds will strengthen across Britain in the first half of the week, soonest across Scotland. Staying windy through into next weekend, gales or sometimes severe gales on higher mountains, particularly Scotland. Rain will become frequent in western Scotland as fronts come in from the Atlantic. Spells of rain elsewhere - less wet for Wales and southern Pennines, although a risk of heavier rain moving further south by the weekend. Temperatures will vary through the next 10 days, sometimes fairly warm and humid, but chiller air spreading from the northwest at times - Scottish high tops occasionally near freezing point.

**Forecast issued at 15:49 on Sunday, 19 September, 2021**

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2021.
