How Cold? (at 750m)	12C rising to 16C.	13C rising to 17C.
Freezing Level	Above the summits	Above the summits

Planning Outlook**All mountain areas of Britain from Sunday, 7 August, 2022**

Southwesterly winds continue to influence Scotland into next week. Rain or drizzle will be most frequent in the Northwest Highlands, where low cloud will often shroud coastal hills. Winds strengthening at times toward gale force on the tops. Further south and east across Scotland, it will be commonly dry with higher cloud bases, becoming warmer and more humid with time. High pressure extends across England and Wales, leading to a settled outlook for the week ahead here, generally dry with light winds, becoming increasingly warm or very warm, particularly in southern areas.

Forecast issued at 16:30 on Friday, 5 August, 2022
