## General Summary for Sunday, 19 May, 2024

### British Mountain Summary:

#### Based on forecast chart for noon 19 May, 2024

Early areas of low cloud and fog will burn away through the morning to leave most mountains clear of cloud with periods of warm sunshine, most extensive for southwestern Scotland, as well as England and Wales. Cloud banks may persist for northern Scotland where it will be cooler. Risk isolated inland showers.

#### Headline for Brecon Beacons

Fine with extensive sunshine and feeling warm. Beware sunburn and dehydration.

## Detailed Forecast for Sunday, 19 May, 2024

<b>How windy? (On the summits)</b>	East to northeasterly, 15 to 20mph, in places gusty 25mph at times.
<b>Effect of wind on you?</b>	Fairly small, but may feel noticeably breezy over some higher terrain, gusty around exposed spots and some passes.
<b>How wet? (Precipitation and its impact)</b>	Rain not expected
<b>Cloud on the hills?</b>	<b>Little if any</b> Risk some patchy fog banks on some slopes early in day, mainly eastern hills, but dispersing or lifting above hills.
<b>Chance of cloud free summits?</b>	<b>90%</b>
<b>Sunshine? Air clarity (below cloud)</b>	Mostly sunny with very good visibility. A little fair-weather cloud may build.
<b>How Cold? (at 750m)</b>	11 to 13C. May then drop cooler onward into night.
<b>Freezing Level</b>	Above the summits

**Brecon Beacons - Looking Ahead**

	<b>Monday 20 May</b>	<b>Tuesday 21 May</b>
<b>How windy? (On the summits)</b>	Easterly 15 to 25mph.	Easterly or variable 5 to 10mph.
<b>Effect of wind on you?</b>	<b>Fairly small, but feeling breezy and rather cool on exposed tops.</b>	<b>Negligible</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Chance of a shower</b> Possible localised showers forming by the late afternoon, mainly toward west.	<b>Mostly dry</b> Risk of some isolated showers. Otherwise, dry.
<b>Cloud on the hills?</b>	<b>Little if any</b>  Patches may drift over higher eastern slopes for a time in the morning, but all lifting or dispersing.	<b>Clear</b>  Mountains clear.
<b>Chance of cloud free summits?</b>	<b>90%</b>	<b>90%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Patchwork of cloud and sun. Visibility good, slight haze.	Sunshine and scattered cloud. Skies may fill in with cloud from the east later. Visibility mostly good or very good.
<b>How Cold? (at 750m)</b>	8C, rising to 10 or 11C afternoon.	8C lifting to 11C
<b>Freezing Level</b>	Above the summits	Above the summits

**Planning Outlook**

**All mountain areas of Britain from Monday, 20 May, 2024**

Pressure stays fairly high early next week. Mostly dry and quite warm for many places, but feeling cooler toward the north and east for a few days as air circulates around from the north. Easterly breezes will remain most common. Low cloud eastern hills at times, western mountains more often clear. Localised showers forming in the afternoons. Risk of more widespread rain developing by midweek with lower pressure likely, but much uncertainty about the position of developing weather systems by this stage.

**Forecast issued at 13:02 on Saturday, 18 May, 2024**
