General Summary for Saturday, 14 June, 2025

British Mountain Summary:

Based on forecast chart for noon 14 June, 2025

Varied across Britain through the day, particularly England and Wales, where some sunshine will be interspersed with rain (including thunderstorms), low cloud and changes in wind speed and direction. Changes slower in Scotland where broadly a band of thundery rain will move northwards.

Headline for Brecon Beacons

Sometimes fine: windy, sometimes low cloud, risk thunderstorm.

Detailed Forecast for Saturday, 14 June, 2025

| | |
|---|--|
| How windy? (On the summits) | South veering southwesterly. Generally 20 or 25 but 30mph for a few hours morning |
| Effect of wind on you? | Mostly fairly small. |
| How wet? (Precipitation and its impact) | Rain on and off; risk thunderstorm Areas of thundery rain before dawn will have cleared. Then a mix through the day: intermittently fine but mainly west Wales, patches of rain and drizzle, including further scattered thunderstorms. |
| Cloud on the hills? | Very extensive, particularly west Wales Persistent fog across the mountains post dawn; the fog sometimes from just above the valleys. Will improve at times; by afternoon cloud frequently confined to highest summits east Wales, but still frequently 500m Cambrian range - and sometimes 300m SW Wales. |
| Chance of cloud free summits? | 50% |
| Sunshine? Air clarity (below cloud) | Patchy sunshine, mainly east and mid Wales afternoon. Visibility very good but in SW Wales very hazy. |
| How Cold? (at 750m) | 12C |
| Freezing Level | Above the summits |

Brecon Beacons - Looking Ahead

| | Sunday 15 June | Monday 16 June |
|---|---|--|
| How windy? (On the summits) | Westerly, varying between 15 and perhaps 25mph. | Between southwest and west; 15 or 20mph. |
| Effect of wind on you? | Fairly small | Small |
| How wet? (Precipitation and its impact) | Drizzly rain, mainly toward coast Risk occasional drizzly rain western mountains. Total rainfall small. Elsewhere, drizzly showers, if any, rare. | Rain unlikely Possibly pockets fine drizzle slopes close to southwest facing coasts. |
| Cloud on the hills? | May not clear higher summits all day; lowest cloud toward west coast Preseli and Cambrian range: cloud base varied, sometimes 300m most often 500 or 600m - but may clear for a few hours middle of day. Elsewhere; cloud base will tend to rise, by afternoon mostly above 650m, perhaps braking above the summits in east Wales. | Persistent near some coasts; cloud base rising to or above higher tops SW Wales: Hills may be foggy most or all day, particularly Preseli, where cloud may be below 200 or 300m (and form on coastal cliffs) Elsewhere: cloud base rising to or above higher summits. |
| Chance of cloud free summits? | 50% | 90% afternoon |
| Sunshine? Air clarity (below cloud) | Patches of sun mainly east Wales. Frequently very good or excellent visibility, but perhaps sometimes misty near the coast. | Patchwork of, or extensive sunshine and very good visibility - but perhaps dull and sometimes misty toward the coast SW Wales. |
| How Cold? (at 750m) | 11C | 13 to 17C warmest east Wales afternoon. |
| Freezing Level | Above the summits. | Above the summits. |

Planning Outlook

All mountain areas of Britain from Sunday, 15 June, 2025

Colder air from the west will reach all areas by Sunday. However, low cloud still extensive on western mountains, together with drizzly showers. Little rainfall most of next week and increasingly warm, although western Scotland colder with occasional rain as weakening fronts affect particularly the NW Highlands. By mid week it should be fine everywhere - although it may not last into the following weekend.

Forecast issued at 16:12 on Friday, 13 June, 2025

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
