General Summary for Monday, 30 June, 2025

British Mountain Summary:

Based on forecast chart for noon 30 June, 2025

Very warm and humid. Gale force southerly winds for NW Scotland at first will ease, but gusty winds strengthen elsewhere. As a front encroaches from the west across the Highlands, bursts of rain will merge into a swathe of more extensive heavy rain, possible thunder. Dry with sunshine for England and Wales, small risk local showers.

Headline for Brecon Beacons

Very warm; sunny, some coastal mist. Moderate breeze.

Detailed Forecast for Monday, 30 June, 2025

How windy? (On the summits)	Southerly 15 to 25mph, strongest in west, becoming gustier through afternoon.
Effect of wind on you?	Starting to affect comfortable walking, particularly later.
How wet? (Precipitation and its impact)	Very likely dry Some fine drizzle possible near coast if in cloud early morning. Most likely all day dry, but during afternoon, small chance of a very isolated burst of rain toward east mid-Wales.
Cloud on the hills?	Little or none away from coastal slopes The mountains clear apart from brief early patches. Very low cloud / fog near to the coast in west particularly morning, tending to thin and break up, but patches may linger.
Chance of cloud free summits?	90%
Sunshine? Air clarity (below cloud)	Sunshine and some thin high cloud. Visibility very good, but some early haze or mist, which may linger near Pembrokeshire coast.
How Cold? (at 750m)	16C where in cloud, up to 20C particularly eastern areas; very humid. Starting to drop into the night.
Freezing Level	Above the summits

Brecon Beacons - Looking Ahead

	Tuesday 1 July	Wednesday 2 July
How windy? (On the summits)	Southwesterly 10 to 15mph.	Northerly or variable 15 to 20mph.
Effect of wind on you?	Small	Fairly small
How wet? (Precipitation and its impact)	Little or no rain Possible spots from high cloud, locally chance of an odd showery burst forming.	Possible patchy rain or showers Risk occasional rain, may be just spots from high cloud. Scattered showers mostly eastern areas, mainly afternoon.
Cloud on the hills?	Mostly little, local low cloud Low cloud or fog mostly coastal areas toward the west. Some cloud banks may drift onto higher slopes inland, but many hills likely clear.	Likely very little Much cloud may be above the hills, occasional patches on higher tops.
Chance of cloud free summits?	70%	70%
Sunshine? Air clarity (below cloud)	Fairly cloudy, glimpses of sun. Visibility good, slight haze.	Areas of high cloud, some sun breaking through. Visibility very good.
How Cold? (at 750m)	11 to 14C, still quite humid.	10 to 12C.
Freezing Level	Above the summits	Above the summits

Planning Outlook**All mountain areas of Britain from Tuesday, 1 July, 2025**

Cooler across Scotland by Monday night as a cold front advances eastwards. Risk of scattered thundery showers Tuesday-Wednesday, mostly eastern areas. High pressure then builds to the south, whilst a humid southwesterly returns to bring spells of rain and low cloud to western Scotland. The second week of July looks cooler for all with sunshine and showers.

Forecast issued at 16:00 on Sunday, 29 June, 2025
