### General Summary for Tuesday, 15 July, 2025

#### British Mountain Summary:

#### Based on forecast chart for noon 15 July, 2025

Heavy and persistent rain for England, Wales and southern Scotland, breaking up into thundery showers into the afternoon. Windy too, gale force over Welsh mountains. Some rain reaches north of the central belt, but most of the Highlands stays dry, with early low cloud rising and the wind mostly light. Much cooler than recently.

#### Headline for Brecon Beacons

Very wet morning, showers afternoon. Windy, up to gale force.

### Detailed Forecast for Tuesday, 15 July, 2025

<b>How windy? (On the summits)</b>	Southwesterly 30 to 40mph, some stronger gusts for periods on high tops in Brecon Beacons.
<b>Effect of wind on you?</b>	<b>Very blustery, frequent buffeting, making walking and balance challenging on exposed ridges.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Heavy rain, later showers</b> Sustained very heavy rain from dawn lasting much of the morning. Breaking up during afternoon to become showery, but some heavy bursts with risk of thunder. Soon very wet underfoot, streams quickly becoming fast-flowing.
<b>Cloud on the hills?</b>	<b>Extensive, some improvement</b> Shrouding the mountains, from low-mid elevations upward in west in morning. Higher bases eastwards, may rise to upper slopes afternoon as rain eases, but rarely clearing tops.
<b>Chance of cloud free summits?</b>	<b>10% later 30%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Cloudy and dull, then skies brighten later in day with occasional sun, visibility very good away from showers.
<b>How Cold? (at 750m)</b>	9 or 10C, small variation all day. Feeling near or below freezing directly in the wind.
<b>Freezing Level</b>	Above the summits

**All mountain areas of Britain from Wednesday, 16 July, 2025**

Dry for many on Wednesday, chance of a very isolated afternoon shower. Humidity rises on Thursday with drizzly rain and low cloud particularly in western regions. A mixed outlook, as slack low pressure drifts slowly over the British Isles, giving scope for slow-moving showers and possible thundery downpours, these most extensive over England and Wales around the weekend. Staying fairly warm, quite humid.

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
