### General Summary for Friday, 25 July, 2025

#### British Mountain Summary:

#### Based on forecast chart for noon 25 July, 2025

Cloud and patchy rain in western Scotland clears east, progressively easing; far east Scotland substantially dry and clear. Patchy cloud over high English and Welsh summits in the morning, deteriorating with the arrival of patchy rain through afternoon. East Wales and south Pennines substantially dry and free of cloud.

#### Headline for Brecon Beacons

Tops often clear, some cloud sets in over west tops later

### Detailed Forecast for Friday, 25 July, 2025

|   |   |
|---|---|
| <b>How windy? (On the summits)</b>                | Generally westerly though some variability, 10 to 15mph. Breezes reaching 20mph at times later in the day.  |
| <b>Effect of wind on you?</b>                     | <b>Mostly small</b>   |
| <b>How wet?</b><br>(Precipitation and its impact) | <b>Little or no rain</b><br>Odd patches of light rain drift onto westernmost slopes late in the day. Otherwise dry.   |
| <b>Cloud on the hills?</b>                        | <b>Tops often clear; cloud arrives onto west tops later</b><br>Varied patchy cloud drifting over some high tops, but many hills often clear early in day. For a few hours through afternoon, cloud banks lowering over tops around 700-800m. Staying often clear toward east. |
| <b>Chance of cloud free summits?</b>              | <b>80%, lowering to 50% western mountains</b>   |
| <b>Sunshine?</b><br>Air clarity (below cloud)     | Patchy sun through morning clouds over in the afternoon; a few glimpses may come out over western areas later.<br>Visibility very good below cloud.   |
| <b>How Cold? (at 750m)</b>                        | 12C rising to 13 or 14C, always warmest on easternmost hills.   |
| <b>Freezing Level</b>                             | Above the summits   |

## Brecon Beacons - Looking Ahead

|  | Saturday 26 July  | Sunday 27 July   |
|--|---|--|
| <b>How windy? (On the summits)</b><br><br><b>Effect of wind on you?</b>                                | Northwesterly 15-20mph, some stronger breezes over tops late in the day.<br><br><b>Fairly small most of the day, ease of walking affected over exposed tops late in the day.</b>  | West to northwesterly around 20mph. Trending northwesterly and rising to 25mph into nighttime.<br><br><b>Comfortable walking at times affected, increasingly breezy into evening.</b>  |
| <b>How wet?</b><br>(Precipitation and its impact)  | <b>Rare spots of rain</b><br>Rare spots of rain mostly western areas.   | <b>Substantially dry</b><br>Chance of light rain in the morning, though may be only local spots, fading for dry mountains.   |
| <b>Cloud on the hills?</b><br><br><br><br><br><br><br><br><br><br><b>Chance of cloud free summits?</b> | <b>Fairly extensive early, clearing many tops</b><br><br>Covering higher areas, possibly more widely varied cloud from lower elevations upward in morning. Tending to lift to patches on tops, increasingly above tops through afternoon. Westernmost tops may struggle to clear.<br><br><b>Rising to 70%</b> | <b>Variable morning cloud clears most tops</b><br><br>Patchy cloud at variable heights in the morning, most extensive low cloud western hills and coastal-facing Cambrians. Rising to clear most tops, though west areas may continue to see caps over summits.<br><br><b>Rising to 80% except westernmost mountains</b> |
| <b>Sunshine?</b><br>Air clarity (below cloud)  | Largely cloudy, increasing bursts of sun later in the day.<br>Visibility good below cloud.  | Likely only glimpses or patchy sun, possibly more frequent for a time.<br>Very good visibility.  |
| <b>How Cold? (at 750m)</b><br><br><b>Freezing Level</b>  | 11 to 13C. Eastern hills may locally reach 14C.<br><br>Above the summits  | 10 or 11C. Easternmost mountains may rise to 12C.<br>Feeling like 3 to 5C in direct wind.<br>Above the summits   |

## Planning Outlook

## All mountain areas of Britain from Saturday, 26 July, 2025

Westerly winds with mixed weather will prevail through the weekend into next week, bringing patchy rain and some heavier showers at times pushing eastwards - Saturday into Sunday may be quite wet for the west of Scotland. Through the week, periods of rain will be punctuated with decent sun breaks, though northwest Scotland will struggle to clear for sun. Often breezy and feeling cool with temperatures lingering near or below average.  
Likely remaining unsettled into the following weekend though details are uncertain.

## Forecast issued at 16:29 on Thursday, 24 July, 2025

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
