### General Summary for Friday, 29 August, 2025

#### British Mountain Summary:

#### Based on forecast chart for noon 29 August, 2025

Rain frequent or persistent for western Scotland most of the day, some slow-moving heavy bursts, these extending increasingly eastwards over the Highlands. Clusters of showery rain over western England and Wales will drift eastwards during the day on fresh and gusty winds.

#### Headline for Brecon Beacons

Showery spells, brisk winds.

### Detailed Forecast for Friday, 29 August, 2025

<b>How windy? (On the summits)</b>	Westerly 20-30mph, occasional stronger gusts over high tops in showers.
<b>Effect of wind on you?</b>	<b>Walking impeded at times; balance challenged in strong gusts over tops.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Showers</b> Often raining on western slopes early morning, breaking into a scattering of showers passing eastward, some heavy bursts, chance isolated thunder.
<b>Cloud on the hills?</b>	<b>Tending to improve though variable</b> Fairly extensive from middle slopes up with banks to lower slopes in rain, most often west. Tending to improve with some breaks forming to or above tops, best in east. Western Cambrians more often capped on tops.
<b>Chance of cloud free summits?</b>	<b>30% rising to 70%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Occasional sun in the east, little or no sunshine west. Visibility very good when out of cloud and rain, largely poor west of Brecon.
<b>How Cold? (at 750m)</b>	10C. Easternmost hills/Black Mountains may rise up to 12C. Feeling near to freezing in the wind on tops.
<b>Freezing Level</b>	Above the summits

## All mountain areas of Britain from Saturday, 30 August, 2025

An unsettled weekend ahead driven by low pressure to the west/north of Scotland. Brisk westerlies will drive showery rain onto western mountains, at times drifting eastwards. Some local thundery downpours may arise. Saturday in particular will be very windy with widespread risk of gales and heavy rain setting in from the southwest. Sunny periods will arise between weather features, greatest chance in eastern areas later in the weekend and early next week. Next week stays mixed with low pressure in charge, frequent rain or showers continuing. Some improvement later in the week as pressure tends to rise.

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
