General Summary for Saturday, 13 September, 2025

British Mountain Summary:

Based on forecast chart for noon 13 September, 2025

Showery south-westerly airflow across the mountains. Most frequent showers western hills, where they will band into prolonged rain for a time with heavy or even torrential bursts. Scattered heavy showers spreading to eastern mountains too. Risk of thunder. Cloud shrouding western hills, occasional further east.

Headline for Brecon Beacons

Blustery and showery day with a marked chill. Cloud frequent higher areas.

Detailed Forecast for Saturday, 13 September, 2025

How windy? (On the summits)	Southwesterly 25 to 40mph, speeds likely to vary during day.
Effect of wind on you?	Frequently strenuous walking on high terrain, affecting balance on exposed tops and ridges. Considerable wind chill.
How wet? (Precipitation and its impact)	Frequent heavy showers Clusters of showery rain, merging to be more constant rain for periods. Heavy bursts on and off, risk of hail and thunder. Tending to become more well scattered from west in afternoon, but still a focus around coastal hills.
Cloud on the hills?	Varied over high tops Cloud base frequently changing, mostly confined to higher summits, bases typically 700-800m. Breaks to tops more often toward east, best afternoon.
Chance of cloud free summits?	40%
Sunshine? Air clarity (below cloud)	Brief glimpses of sun mostly in east Wales. Visibility often reduced by rain, intermittently good.
How Cold? (at 750m)	6 or 7C. Feeling sub-zero, around -4C on highest tops directly in the wind.
Freezing Level	Above the summits

All mountain areas of Britain from Sunday, 14 September, 2025

During Sunday and into Monday, a deeper Atlantic low is expected to move in, bringing more extensive heavy rain northwards and gales - the strongest wind probably focused on England & Wales. Some improvement expected for a time into middle of next week, but the longer range outlook into late September remains unsettled.

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
