General Summary for Tuesday, 31 March, 2026

British Mountain Summary:

Based on forecast chart for noon 31 March, 2026

A foggy, drizzly start for most, fog to lower slopes in western coastal areas. Fog lifts with time and drizzly rain eases, bursts of sun breaking out east, and perhaps more widely afternoon. Fog and drizzle lingers longest west Scotland and south Pennines. Blustery early, easing for most; a mild feel in England and Wales.

Headline for Brecon Beacons

Breezy and drizzly early, improving with sun breaks

Detailed Forecast for Tuesday, 31 March, 2026

How windy? (On the summits)	Northwesterly, 20-25mph at dawn, likely gusty too, up to 30mph or higher over high tops and passes. An easing trend and shifting westerly with time, settling near 15-20mph.
Effect of wind on you?	Fairly small, but gusts in exposure early in the day may briefly affect stability.
How wet? (Precipitation and its impact)	Drizzly rain, fading during day Drizzle and light rain most persistent and widespread during the morning. Tending to fade, but patchy drizzle may linger on western Cambrians, a few patches drifting further east; feeling generally damp where within cloud.
Cloud on the hills?	Extensive, then rising and breaking, summits clear for periods Blanket low cloud across the hills in the morning, from lower elevations up in west, 400-500m inland. Tending to rise to 600-700m, breaks gradually forming, off summits for periods, but patches likely linger western Cambrians.
Chance of cloud free summits?	Below 10%, rising to 60% afternoon.
Sunshine? Air clarity (below cloud)	Cloudy and misty early, some brighter moments emerge with time inland, perhaps more widely afternoon, visibility becoming good where cloud lifts and breaks.
How Cold? (at 750m)	6C, lifting to 7C, 8C Black Mountains. Feeling near freezing direct in the wind in the morning.
Freezing Level	Above the summits.

Brecon Beacons - Looking Ahead

	Wednesday 1 April	Thursday 2 April
How windy? (On the summits)	West to southwesterly 10 to 20mph, may strengthen with time from north.	West-northwesterly 15-25mph.
Effect of wind on you?	Mostly small, but risk turning more blustery on higher tops later in the day.	Fairly small
How wet? (Precipitation and its impact)	Little if any rain Chance of odd drizzly showers.	Likely dry A small chance of early light rain on easternmost hills, soon dry.
Cloud on the hills?	Covering tops most often in west Varied cloud banks over higher slopes, most persistent toward the west above 600m, often nearer 800m eastward, with breaks over tops in Black Mountains.	Substantially clear From dawn, banks of cloud above 500m, may be in several layers, many hills clear too. Cloud lifts after sunrise, clearing the summits.
Chance of cloud free summits?	40%	Rising to 80%
Sunshine? Air clarity (below cloud)	Patchy sunshine breaking out here and there, perhaps more frequently for a time afternoon. Visibility good below cloud.	Often or mostly sunny. Excellent visibility.
How Cold? (at 750m)	5 or 6C. Feeling near or just below 0C if exposed to wind.	0C at dawn, lifting to 2C, perhaps higher, the highest temperatures likely south and east.
Freezing Level	Above the summits.	Starting near 700m, lifting likely rising above the summits; some chance starting nearer the higher summits.

Planning Outlook**All mountain areas of Britain from Wednesday, 1 April, 2026**

A drop of temperature is expected across Scotland during Wednesday as a band of rain drifts slowly southwards, turning to heavy upland snow. Atlantic weather patterns and west-southwesterly winds follow behind into the start of the Easter period at least, but day-to-day detail is uncertain. Temperature and wind will be variable, periods of gales and possibly often cold over the mountains with snow and hail showers at times to lower elevations at least in Scotland, sometimes more widely, mixed with some spells of rain - precipitation generally most frequent west and northwest, though bands of heavy rain will sweep east at times. Some windows of drier and brighter conditions, as well as milder days in England and Wales, occasionally milder Scotland too.

Forecast issued at 15:50 on Monday, 30 March, 2026

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
