General Summary for Sunday, 24 May, 2026

British Mountain Summary:
Based on forecast chart for noon 24 May, 2026

High pressure bringing dry and warm conditions to England and Wales and southern and eastern Scotland with early patchy hill fog in the west dispersing. Warm or very warm in valleys, beware of sunburn and dehydration. Blustery south-westerly winds will feed low cloud and drizzly rain across northwest Scotland.

Headline for Brecon Beacons

A dry and increasingly very warm day with extensive and strong sunshine.

Detailed Forecast for Sunday, 24 May, 2026

How windy? (On the summits)	South to south-westerly 5 to 15mph
Effect of wind on you?	Mostly negligible
How wet? (Precipitation and its impact)	Dry
Cloud on the hills?	Mountains clear Aside from some patches of banks across coastal hills early in morning, which will burn off, hills are expected to be clear.
Chance of cloud free summits?	Almost certain
Sunshine? Air clarity (below cloud)	Widely sunny. Visibility very good.
How Cold? (at 750m)	13C lifting to 17C, very warm
Freezing Level	Well above the summits

Brecon Beacons - Looking Ahead

	Monday 25 May	Tuesday 26 May
How windy? (On the summits)	Southerly 5 to 10mph.	Varying in direction, 5-10mph or less; perhaps locally up to 15mph some coastal hills where sea breezes develop.
Effect of wind on you?	Negligible	Mostly negligible
How wet? (Precipitation and its impact)	Dry	Substantially or completely dry Very likely dry, but risk of cloud bubbling up in the afternoon inland to give an isolated, but should they occur, slow-moving shower.
Cloud on the hills?	Mountains clear Any early mist will soon disperse to leave the mountains clear.	Mountains clear Perhaps some early fragments of mist and low cloud, mainly around coastal hills in the west. Otherwise, hills clear.
Chance of cloud free summits?	Greater than 90%	
Sunshine? Air clarity (below cloud)	Widespread and strong sunshine. Good visibility, but slight haze.	Widespread sunshine, but areas of cloud may bubble up in the afternoon. Visibility mostly good, but marked haze.
How Cold? (at 750m)	19C, very humid	20C, very humid. Valley temperatures rising to high 20s.
Freezing Level	Well above the summits. Valley temperatures reaching the high 20s.	Well above the summits

Planning Outlook**All mountain areas of Britain from Monday, 25 May, 2026**

High pressure dominates this week with early patchy low cloud, mainly coastal hills dispersing to give widespread warm or very warm sunshine, highest temperatures valleys of England and Wales; where into the high 20s Monday and Tuesday Peak District into Wales with high humidity. Chance of well scattered shower development from midweek as a gusty south-easterly develops for western hills. Pressure lowering next weekend into next week.
