General Summary for Friday, 7 August, 2026

British Mountain Summary:

Based on forecast chart for noon 7 August, 2026

Rain in the Scottish Highlands, persistent central/west areas; windy too, gales developing over summits. Some early rain in England, cloud covering high terrain, improving for frequent sun and minimal hill cloud. Light wind and mostly sunny Wales, just some early cloud and dampness high Snowdonia terrain.

Headline for Brecon Beacons

Calm wind, little hill cloud, patchwork of sunshine

Detailed Forecast for Friday, 7 August, 2026

How windy? (On the summits)	A variable west-southwesterly 10mph and often less.
Effect of wind on you?	Negligible.
How wet? (Precipitation and its impact)	Likely dry A fine drizzle may affect high tops in the early hours, soon fading for dry hills.
Cloud on the hills?	Substantially clear Patchy cloud at varied elevations in the morning begins lifting to high terrain after dawn. Most summits will clear, but a few odd banks may continue to graze the highest summits to the west for a time.
Chance of cloud free summits?	Rising to 90%
Sunshine? Air clarity (below cloud)	Often sunny but varied patchy cloud around. Very good visibility.
How Cold? (at 750m)	9C rising to 11 to 13C, warmest eastern hills, and only a slight drop into night.
Freezing Level	Above the summits.

All mountain areas of Britain from Saturday, 8 August, 2026

Westerly winds prevail into the weekend: Saturday will see extensive cloud and heavy rain develop across Scotland with gales; bands of rain passing to the south and east into England and Wales through Sunday with showers in Scotland . A ridge of high pressure early next week brings warmer temperatures and clearer hills, though western areas likely remain fairly cloudy with some drizzle on the high tops. Westerly flow returns through mid-week and a series of low pressure systems will pass west-to-east across the country with periods of strong wind (sometimes gales), rain, and low cloud, western hill groups always most affected . Mild-to-warm temperatures and sometimes quite humid. Changeable conditions persist into next weekend.

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
