General Summary for Sunday, 1 November, 2026

British Mountain Summary:

Based on forecast chart for noon 1 November, 2026

A fine day for the Highlands, with sunshine and just patchy cloud around some tops. One or two light showers in northern areas. A weakening front drifts south over England & Wales giving cloudy skies and a little rain for a time, mainly more eastern hills. Light-moderate winds overall, but feeling chilly.

Headline for Brecon Beacons

Varied cloud and fog; breezy, feeling cool.

Detailed Forecast for Sunday, 1 November, 2026

How windy? (On the summits)	North to northeasterly 20mph, at times 25mph over higher exposed terrain.
Effect of wind on you?	Fairly small effect on walking, but noticeably breezy and feeling rather chilly over the tops.
How wet? (Precipitation and its impact)	Some drizzle develops east Some early dampness around fog. During afternoon and onward into evening, drizzle or an odd sprinkle of light rain developing mainly over eastern mid-Wales, otherwise largely dry.
Cloud on the hills?	Mix of low fog and some cloud banks From dawn, fog mostly in valleys and lower hill slopes, with high tops above this for a time, but banks of low cloud likely to drift onto higher terrain, mostly in east. Southwestern areas clearer.
Chance of cloud free summits?	50%
Sunshine? Air clarity (below cloud)	Areas of fog may be confined to lower ground at first, sunshine on hills, but then may cloud over from north.
How Cold? (at 750m)	6 or 7C, little change all day, small variation with height in morning. Feeling near 0C in the breeze on tops.
Freezing Level	Above the summits

All mountain areas of Britain from Monday, 2 November, 2026

A settled start to November as high pressure resides toward the north. Largely dry weather throughout the week ahead. Variable cloud will be drawn in from the North Sea on easterly winds, at times some light showers mainly for Pennine areas. Best chance for inversion conditions will be on higher tops in Scotland, emerging above cloud at times. Sunshine typically best toward western coasts. Temperatures mostly above freezing on high terrain, but some frost overnight in glens and some upland hollows. Quiet weather may continue into next weekend, then a trend toward more unsettled conditions into mid-month, possibly colder patterns too.

Forecast issued at 16:00 on Saturday, 31 October, 2026

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
