General Summary for Monday, 2 November, 2026

British Mountain Summary:
Based on forecast chart for noon 2 November, 2026

Light winds for much of the Highlands; a stronger northeasterly breeze for England & Wales, particularly toward the south, feeling chilly. Generally dry, sunshine best in southern Scotland and toward the Irish Sea coast. Some cloud banks in northern Scotland, but high mountains may poke out above this.

Headline for Brecon Beacons

Strong breeze, patchy cloud lifting, then hills clear, sunnier west.

Detailed Forecast for Monday, 2 November, 2026

How windy? (On the summits)	East to northeasterly often 25mph, gusty in places around higher tops, local 30mph and tending to rise a little during day.
Effect of wind on you?	**Feeling blustery and chilly on high terrain. Ease of walking affected and gusts starting to affect balance in exposure.**
How wet? (Precipitation and its impact)	**Rain not expected**
Cloud on the hills?	**Early local patches lift** Patches sometimes grazing higher slopes, mostly in the morning and toward the east, but most cloud lifting to be above hills, or just largely clear.
Chance of cloud free summits?	**80% rising above 90%**
Sunshine? Air clarity (below cloud)	Patchwork of sun, best in west. Visibility very good, some haze lower down.
How Cold? (at 750m)	3 to 5C. Feeling like -5C directly in wind.
Freezing Level	Above the summits, but patchy frost in valleys at first, also some sheltered higher slopes.

Brecon Beacons - Looking Ahead

	Tuesday 3 November	Wednesday 4 November
How windy? (On the summits)	East to northeasterly 25 to 30mph, very gusty in places around high tops, some increase to 30-35mph with time.	Easterly 30 to 40mph, very gusty in places around some tops, elevated passes and locally down western slopes.
Effect of wind on you?	**Blustery with considerable wind chill on exposed terrain, some strenuous walking higher up and gusts affecting balance.**	**Affecting comfortable walking on higher slopes, buffeting gusts in places making balance tricky. Considerable wind chill.**
How wet? (Precipitation and its impact)	**A little drizzle east** Occasional drizzle mostly confined to eastern hills. Further west, patchier or very little at all.	**Largely dry** Spots of light rain in the wind at times, mainly eastern hills.
Cloud on the hills?	**Most persistent eastern tops** Cloud banks drifting over higher slopes most often toward the east of Wales, base around 700m; may thin a little during day. More broken cloud westwards, often clear toward Pembrokeshire.	**Patches some tops** Grazing higher slopes occasionally, mostly above 700m and mainly eastern hills, but well broken westwards, often lifting higher.
Chance of cloud free summits?	**70% near W coast, to 30% E tops.**	**70%**
Sunshine? Air clarity (below cloud)	Fairly cloudy, occasional sun breaking through, more often west and southwest. Visibility good, slight haze mainly east.	Patchy cloud and sun, best in west. Visibility good, though some haze especially eastern areas.
How Cold? (at 750m)	5C, little change all day. Feeling like -5C directly in the wind.	3C. Feeling like -7 to -10C directly in the wind.
Freezing Level	Above the summits.	Just above freezing on highest summits.

Planning Outlook

All mountain areas of Britain from Tuesday, 3 November, 2026

A settled week ahead as high pressure resides toward the north. Easterly winds will prevail, strongest for Wales and the southern Pennines. Largely dry weather, whilst variable cloud will be drawn in from the North Sea, at times some light showers in eastern areas. Best chance for inversion conditions will be on higher tops in Scotland, emerging above cloud at times. Sunshine typically best toward western coasts. Temperatures mostly above freezing on high terrain, but some frost overnight in glens and some upland hollows; then cooler toward the weekend on tops. Quiet weather also likely as next weekend begins, perhaps further ahead, though a mixed Atlantic influence may return to Scotland.

Forecast issued at 16:00 on Sunday, 1 November, 2026

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
