## General Summary for Sunday, 28 December, 2025

### British Mountain Summary:

**Based on forecast chart for noon 28 December, 2025**

High pressure brings dry and sunny conditions to the Highlands with little wind and the mountains clear, although some fog in the glens. Elsewhere, an east wind will continue to feed cloud into the Scottish Borders, N Pennines, and east Wales with scope for spots of drizzle. Still dry and sunny toward west coast.

### Headline for Cairngorms NP and Monadhliath

Light winds with sun and mountains clear, above patchy fog.  
 Terrain mostly frozen.

## Detailed Forecast for Sunday, 28 December, 2025

<b>How windy? (On the Munros)</b>	North to northeasterly or variable, 10mph or less.
<b>Effect of wind on you?</b>	Small
<b>How wet?</b> (Precipitation and its impact)	Dry all day
<b>Cloud on the hills?</b>	<b>None expected</b> Fog patches some glens, perhaps an odd pocket of mist in some corries. Otherwise the mountains clear.
<b>Chance of cloud free Munros?</b>	<b>Above 90%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Widely sunny, though a layer of thin high cloud for a few hours. Visibility excellent.
<b>How Cold? (at 900m)</b>	3C, inversion conditions - hills warmer than lower slopes all day - up to 5C highest summits.
<b>Freezing Level</b>	Frost in glens and lower slopes, also in some upland hollows and corries, all day out of sunlight; above freezing on tops.

**All mountain areas of Britain from Monday, 29 December, 2025**

Early next week, high pressure still dominates, but generally colder air becoming entrained into its circulation from the north, which sees lower temperatures on high terrain. Small amounts of precipitation, occasional showers or snow flurries. Later in the week, a stronger and colder northerly may develop with snow and hail showers becoming frequent in the north and down coastal extremities elsewhere.

The production of the Scottish forecasts is fully funded by the Scottish Government through Mountaineering Scotland with the support of sportscotland. Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
