General Summary for Tuesday, 11 August, 2026

British Mountain Summary:

Based on forecast chart for noon 11 August, 2026

Fine and widely sunny - albeit patches of high thin cloud. In Scotland cloudy at times near west coast, whilst centred on the SE Highlands, persistent low cloud in the morning. Becoming very warm England and Wales.

Headline for Cairngorms NP and Monadhliath

Dry; extensive sunshine, low cloud southern Cairngorms NP morning.

Detailed Forecast for Tuesday, 11 August, 2026

How windy? (On the Munros)	Southerly 10 to 15mph.
Effect of wind on you?	Mostly negligible
How wet? (Precipitation and its impact)	Rain not expected
Cloud on the hills?	Fog, mainly S Cairngorms NP morning. In morning cloud above about 500m widely southern Cairngorms NP, although little if any reaching Monadhliath east to N Cairngorms. Highest summits could be above the cloud. The base will rise before eventually dispersing into the afternoon.
Chance of cloud free Munros?	Rising to become almost certain from north, although widely 10% morning
Sunshine? Air clarity (below cloud)	More or less unbroken, sometimes through high thin cloud Monadhliath east to N Cairngorms. Gradually the sun will extend south and eastwards. Superb visibility.
How Cold? (at 900m)	7C rising to 16C
Freezing Level	Above the summits.

All mountain areas of Britain from Wednesday, 12 August, 2026

There may be little change in the pattern into next week - although there is uncertainty in the track of oncoming rain on low cloud at the end of the weekend.
