

Lake District

The entire Lake District National Park, taking in all major summits, including Scafell, Helvellyn, Skiddaw, the Langdales and Old Man of Coniston.

Wheelwrights Cottages provide a wide range of self-catering accommodation around Langdale and beyond to suit all requirements. Please call us on 015394 37635 for details or go to www.wheelwrights.com

General Summary for Saturday, 2 November, 2024

British Mountain Summary:

Based on forecast chart for noon 2 November, 2024

Widely dull and murky, breaks in cloud most likely in eastern Scotland and western Wales. Rain or drizzle in West and Northwest Highlands, elsewhere most likely dry. In northern Scotland windy, elsewhere mostly light winds. Mild.

Headline for Lake District

Murky but mostly dry, light winds, mild

Detailed Forecast for Saturday, 2 November, 2024

How windy? (On the summits)	Variable, mostly southerly, 5 to 15mph.
Effect of wind on you?	Negligible.
How wet? (Precipitation and its impact)	Rain unlikely Low risk occasional drizzle from low cloud.
Cloud on the hills?	Extensive, may break, likeliest east Fells covered in cloud, most likely top to bottom in morning. Cloud slowly lifting to mid or some upper slopes, may partly break. Chance for higher cloud base and more frequent breaks toward Blencathra.
Chance of cloud free summits?	20%
Sunshine? Air clarity (below cloud)	Glimpses of sunshine toward the north, but generally cloudy and dull. Very good visibility if not in cloud.
How Cold? (at 750m)	7 to 10C
Freezing Level	Above the summits.

Lake District - Looking Ahead

	Sunday 3 November	Monday 4 November
How windy? (On the summits)	Mostly south or southeasterly, 10 to 20mph.	Southeasterly, 15 to 20-25mph. At times may be complete lull.
Effect of wind on you?	Small.	Fairly small.
How wet? (Precipitation and its impact)	No rain expected	Rain unlikely Extensively dry, but drizzle here and there - most likely only south lakes.
Cloud on the hills?	Varied cloud banks, some breaks Low cloud and fog in the valleys. Varied banks drifting onto higher slopes, but some tops above or between cloud banks. Particularly on south-facing slopes in south Lakeland, fog may persist all day.	Extensive - lowest and most extensive cloud south lakes Cloud probably extensive above 500 to 750m, although may break up in places. Additionally, patches of fog some lower slopes, particularly morning south lakes.
Chance of cloud free summits?	60%	20%
Sunshine? Air clarity (below cloud)	Plenty of sunshine and excellent visibility if above the cloud. Hazier or misty lower down in morning.	Sunshine coming through in some places, particularly north lakes, but overall cloudy or dull. Persistently hazy.
How Cold? (at 750m)	Around 10C	5C
Freezing Level	Above the summits.	Above the summits.

Planning Outlook**All mountain areas of Britain from Sunday, 3 November, 2024**

High pressure conditions for the weekend and beginning of next week. Inversion developing means often very misty or cloudy, but tops sometimes above cloud - especially the Munros. Southwesterly winds, dry and mild conditions. Such scheme holds until Tuesday afternoon, when a weak front passage will deteriorate weather for a day along the western coastal mountains especially. Later another few days of often cloudy, but dry and even warmer weather. Winds may speed up again end of next week. During the weekend, more often wet conditions are likely, but at this stage uncertainty is still fairly high.

Forecast issued at 16:25 on Friday, 1 November, 2024

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2024.
