

Lake District

The entire Lake District National Park, taking in all major summits, including Scafell, Helvellyn, Skiddaw, the Langdales and Old Man of Conistone.

Wheelwrights Cottages provide a wide range of self-catering accommodation around Langdale and beyond to suit all requirements. Please call us on 015394 37635 for details or go to www.wheelwrights.com

General Summary for Saturday, 14 June, 2025

British Mountain Summary:

Based on forecast chart for noon 14 June, 2025

Varied across Britain through the day, particularly England and Wales, where some sunshine will be interspersed with rain (including thunderstorms), low cloud and changes in wind speed and direction. Changes slower in Scotland where broadly a band of thundery rain will move northwards.

Headline for Lake District

Very varied: Thunderstorms, low cloud and strong wind. Sometimes fine.

Detailed Forecast for Saturday, 14 June, 2025

How windy? (On the summits) Effect of wind on you?	Direction and speed varied. Up to 35mph at dawn (easterly) and again later afternoon (westerly); but a prolonged lull centred middle of day. Sometimes fairly small, but at first and again later gusts winds (including on lower slopes) will make balance difficult for periods.
How wet? (Precipitation and its impact)	Thunderstorms mainly morning but rain on and off all day Morning: Widespread thunderstorms giving locally torrential rain and flash flooding from dawn will ease within a few hours, but still bursts of rain all morning. Afternoon: Rain and drizzle and further bursts of thundery rain but also dry periods, particularly north lakes.
Cloud on the hills? Chance of cloud free summits?	Very extensive dawn; cloud base gradually rising Frequent or persistent fog higher slopes, sometimes below 600m, but in south lakes periods when cloud base near or below 300m. A few breaks in the cloud, may allow some fells to clear temporarily (best chance north lakes). Less than 10% south lakes; 20% afternoon north lakes
Sunshine? Air clarity (below cloud)	Cloudy or dull and misty most of day, although patches of sun at times (mainly N lakes). Visibility mostly excellent.
How Cold? (at 750m) Freezing Level	11C Above the summits

Lake District - Looking Ahead

	Sunday 15 June	Monday 16 June
How windy? (On the summits)	Westerly, 25mph.	Between southwest and west; 25mph - perhaps 35mph at times higher summits.
Effect of wind on you?	Fairly small	Expect walking to be increasingly Impeded with height: perhaps arduous on higher tops. Considerable wind chill.
How wet? (Precipitation and its impact)	Risk drizzly showers west Cumbria Occasional drizzly rain, generally confined to western and perhaps central fells. Total rainfall small. Elsewhere, drizzly showers, if any, rare.	Rain unlikely
Cloud on the hills?	Unlikely to clear all day; lowest cloud base near the coast Western and central fells: cloud base sometimes lower than 300m coastal slopes, mostly around 650m but may for a few hours 600m reach 800m. Toward east Cumbria: cloud base will rise, by afternoon mostly above 800m.	Persistent near coast; cloud base rising to or above higher tops north lakes South lakes and areas west of Honister: Hills foggy all day, the cloud base typically 450m late morning, perhaps 600m afternoon. Elsewhere: cloud base rising to 800 to 1000m.
Chance of cloud free summits?	30%	20% south/west to 70% north/east
Sunshine? Air clarity (below cloud)	Patches of sun, mainly east Cumbria. Risk at times misty near the coast; very good visibility otherwise	Patchwork of sunshine and very good visibility.
How Cold? (at 750m)	9C	11C.
Freezing Level	Above the summits.	Will feel only just above freezing point directly in the wind. Above the summits.

Planning Outlook

All mountain areas of Britain from Sunday, 15 June, 2025

Colder air from the west will reach all areas by Sunday. However, low cloud still extensive on western mountains, together with drizzly showers. Little rainfall most of next week and increasingly warm, although western Scotland colder with occasional rain as weakening fronts affect particularly the NW Highlands. By mid week it should be fine everywhere - although it may not last into the following weekend.

Forecast issued at 16:12 on Friday, 13 June, 2025

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
