<b>Freezing Level</b>	Above the summits

## All mountain areas of Britain from Friday, 4 July, 2025

Friday brings sustained heavy rain to western Scotland, rain extending further south with time; gales over the mountains, severe on Scottish tops. The weekend stays unsettled, windy and rather cool with low pressure bringing heavy showery rain widely, risk isolated thunder. Next week maintains a mixed westerly regime with greatest risk of rain toward northwest Scotland, drier and warmer further south and east.

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
