## General Summary for Sunday, 13 July, 2025

## British Mountain Summary:

#### Based on forecast chart for noon 13 July, 2025

Very warm across the mountains from overnight, soon feeling hot in morning sun. Some valleys again approaching 30C by early afternoon, though mostly slightly less hot than Saturday. A veil of high cloud tending to weaken the sun. Local gusty E-SE'ly winds. Generally dry, later a chance of very isolated showers.

#### Headline for Lake District

Very warm, sun and increasing high cloud, gusty in places.

## Detailed Forecast for Sunday, 13 July, 2025

How windy? (On the summits)	Southeasterly 15mph most of the day, some stronger gusts around low slopes early. Rising to 20mph into evening.
Effect of wind on you?	Mostly small, some occasional gusty spots may feel noticeable.
How wet?	Small risk a late shower
(Precipitation and its impact)	Possible local spots of rain from high cloud later in the day, remote risk of an isolated thundery burst of rain by evening.
Cloud on the hills?	Fells clear
Chance of cloud free summits?	100%
Sunshine? Air clarity (below cloud)	A sunny morning, then a patchwork of cloud building, increasingly shrouding sun. Excellent visibility.
How Cold? (at 750m)	17 or 18C, already very warm from overnight, little change during the day, then cooling slightly into evening. Valleys reaching 27C early afternoon.
Freezing Level	Above the summits

## MOUNTAIN WEATHER INFORMATION SERVICE

#### Lake District - Looking Ahead

	Monday 14 July	Tuesday 15 July
How windy? (On the summits)	Southeast soon turning south, later southwesterly; 20 to 30mph, speeds may vary, at times sudden gusts 35-40mph.	Southwesterly 20 to 30mph. May drop lighter and variable for a time.
Effect of wind on you?	At times affecting comfortable walking on exposed terrain, buffeting gusts, risk more challenging conditions for periods.	Blustery, starting to affect comfortable walking and balance on exposed ridges.
How wet?	Thunderstorms likely	Rain on and off, sometimes heavy
(Precipitation and its impact)	Risk heavy and possibly thundery bursts of rain soon in the morning, likely setting in to give widespread heavy rain, torrential bursts and thunderstorms. May break up afternoon, but further thundery showers.	Risk of fairly persistent rain, some heavy showery bursts mixed in, drifting eastwards. Tending to break up later afternoon, but patchy showery rain may continue into evening.
Cloud on the hills?	Extensive low cloud, may lift later	Fairly extensive, may improve a little
	Varied low cloud from dawn, to mid or lower elevations. Filling in widely in rain, cloud banks from forest canopies up. During afternoon, may lift and break.	Shrouding higher fells most or all day; cloud banks most extensive to some lower elevations in morning, tending to become confined to upper slopes, some higher breaks possible later afternoon.
Chance of cloud free summits?	10% rising to 50% later	30%
Sunshine? Air clarity (below cloud)	Overcast. Hazy, very murky in rain; may improve later in day.	Largely cloudy, some sun breaking through afternoon. Misty or murky in rain, visibility may improve with time, better later inland.
How Cold? (at 750m)	10C where in cloud, up to 13C for a time. Tending to lower slightly later.	Around 10C, or slightly cooler early in day.

## Planning Outlook

#### All mountain areas of Britain from Monday, 14 July, 2025

Lowering pressure from southwest late Sunday into Monday bringing increasing risk bursts of rain and thunderstorms to start the new week, strong and gusty southerly winds. Temperatures will cool towards average. Heavy rain likely moving across England and Wales on Tuesday accompanied by near-gale southwesterlies, lighter winds Scotland. Low pressure is likely to be common in the extended outlook with slow-moving areas of showery rain, some thundery bursts locally, interspersed with drier days. Temperatures often on the warm side, some humid days.

#### Forecast issued at 16:00 on Saturday, 12 July, 2025

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
