

Lake District

The entire Lake District National Park, taking in all major summits, including Scafell, Helvellyn, Skiddaw, the Langdales and Old Man of Coniston.

Wheelwrights Cottages provide a wide range of self-catering accommodation around Langdale and beyond to suit all requirements. Please call us on 015394 37635 for details or go to www.wheelwrights.com

General Summary for Wednesday, 13 August, 2025

British Mountain Summary:

Based on forecast chart for noon 13 August, 2025

Very warm and humid across the mountains. Extensively fine with hazy sunshine, but patchy cloud south and west Wales and through the day cloud building to give bursts of rain and thunderstorms Scottish Highlands. Elsewhere, risk very isolated thundery rain. Light wind.

Headline for Lake District

Very warm and humid, sunshine but chance thunderstorm.

Detailed Forecast for Wednesday, 13 August, 2025

How windy? (On the summits)	Southerly 10 to 15mph - possibly occasionally 20mph.
Effect of wind on you?	Mostly negligible
How wet? (Precipitation and its impact)	Risk isolated thunderstorms Very likely dry, small risk of a thunderstorm toward or during evening.
Cloud on the hills?	Little if any
Chance of cloud free summits?	Almost certain
Sunshine? Air clarity (below cloud)	Extensive sunshine. Good visibility, albeit hazy.
How Cold? (at 750m)	18 rising to an unusually warm 24C: feeling very humid.
Freezing Level	Above the summits

Lake District - Looking Ahead

	Thursday 14 August	Friday 15 August
How windy? (On the summits)	Southwest to westerly 10 to perhaps later 15 or 20mph.	East or northeasterly, 10mph or less.
Effect of wind on you?	Small	Negligible
How wet? (Precipitation and its impact)	Rain occasionally - amounting to very little Pockets of drizzly rain morning (and possibly post dawn the odd heavy thundery burst). By afternoon, here and there the odd patch of rain still left but extensively dry.	Rain not expected
Cloud on the hills?	Extensive, particularly western hills morning Confidence low: Fog covering hills at various heights most or all day In south lakes and on western fells elsewhere, very low cloud base - though may break 650m afternoon. Elsewhere, areas of very low cloud morning, but some or most summits clearing.	Little if any by afternoon Low confidence morning; ribbons of fog some or many valleys and lower slopes - most or perhaps all higher areas could be above the fog. By late morning, the fog clearing.
Chance of cloud free summits?	20% rising to 60%	90% from midday
Sunshine? Air clarity (below cloud)	Patches of sunshine gradually coming through. Haze progressively clearing to give excellent visibility.	Sunshine increasingly breaking through during morning. Fog clearing to excellent visibility.
How Cold? (at 750m)	14 to 17C, warmest well inland.	13C rising to 17C.
Freezing Level	Above the summits	Above the summits.

Planning Outlook

All mountain areas of Britain from Thursday, 14 August, 2025

High pressure, generally centred near northern Britain, will develop toward the weekend, bringing a low rainfall (although here and there thundery showers) and for most mountains areas extensive sunshine and light winds. Nevertheless, cloud will come and go, most widely across more eastern mountains. It will remain very warm but feel slightly less humid than at present.

Forecast issued at 13:46 on Tuesday, 12 August, 2025

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
