## General Summary for Friday, 29 August, 2025

### British Mountain Summary:

#### Based on forecast chart for noon 29 August, 2025

Rain frequent or persistent for western Scotland most of the day, some slow-moving heavy bursts, these extending increasingly eastwards over the Highlands. Clusters of showery rain over western England and Wales will drift eastwards during the day on fresh and gusty winds.

### Headline for Lake District

Showery spells, drier for a time, brisk winds.

## Detailed Forecast for Friday, 29 August, 2025

<b>How windy? (On the summits)</b>	Southwesterly 20-25mph, at times up to 30mph over tops; trending westerly through the day; gusty in showers.
<b>Effect of wind on you?</b>	<b>May be fairly small at times, though comfort of walking and balance affected on high tops.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Showery rain</b> Frequent and often heavy rain from dawn into the morning, breaking up into a scattering of showers, drier for a time into afternoon, but further clusters of showers develop afternoon-evening from west, chance isolated thunder.
<b>Cloud on the hills?</b>	<b>Most extensive western fells</b> Extensive from middle slopes upward on western fells in morning, bases varied, some breaks higher up when dry, but likely lowering again later. More patchy and higher bases on eastern fells, clearing tops at times when dry.
<b>Chance of cloud free summits?</b>	<b>20% rising to 50% afternoon</b>
<b>Sunshine?</b> Air clarity (below cloud)	Glimpses of sun. Visibility very good in the east at first, tending to deteriorate if rain sets in.
<b>How Cold? (at 750m)</b>	9 or 10C. Feeling near to freezing in the wind on tops.
<b>Freezing Level</b>	Above the summits

## All mountain areas of Britain from Saturday, 30 August, 2025

An unsettled weekend ahead driven by low pressure to the west/north of Scotland. Brisk westerlies will drive showery rain onto western mountains, at times drifting eastwards. Some local thundery downpours may arise. Saturday in particular will be very windy with widespread risk of gales and heavy rain setting in from the southwest. Sunny periods will arise between weather features, greatest chance in eastern areas later in the weekend and early next week. Next week stays mixed with low pressure in charge, frequent rain or showers continuing. Some improvement later in the week as pressure tends to rise.

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
