#### MOUNTAIN WEATHER INFORMATION SERVICE

# **Lake District**

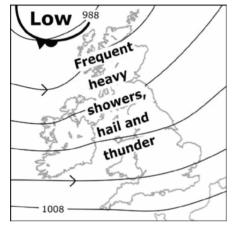

The entire Lake District National Park, taking in all major summits, including Scafell, Helvellyn, Skiddaw, the Langdales and Old Man of Coniston.

Wheelwrights Cottages provide a wide range of self-catering accommodation around Langdale and beyond to suit all requirements. Please call us on 015394 37635 for details or go to www.wheelwrights.com

# General Summary for Thursday, 11 September, 2025

# British Mountain Summary: Based on forecast chart for noon 11 September, 2025

Gale force winds over many Scottish high tops in the morning, but persistent all day toward the northwest; powerful squally gusts around showers. Up to gale-force also on Welsh high tops. Heavy downpours already affect most of western Britain from dawn, increasingly widespread with hail, thunder & lightning.

#### **Headline for Lake District**

Windy, squally gusts near-gale. Showery bursts, hail & thunder.

### Detailed Forecast for Thursday, 11 September, 2025

How windy? (On the summits)	Southwesterly 25 to 35mph, occasionally 40mph higher summits, sudden squally gusts in showers.	
Effect of wind on you?	Walking often strenuous; notable stability challenges on exposed tops and ridges. Significant wind chill.	
How wet? (Precipitation and its impact)	Frequent heavy showers, risk thunder Showers most of the day, often passing through quickly inland, but at times more frequent. Heavy bursts with risk of hail and thunder. Rain fairly persistent on western fells, especially morning.	
Cloud on the hills?	Fairly extensive, highest bases north/east	
	Fairly extensive above 600-700m most of the day with lower bases on western fells.  Bases more variable from Helvellyn to Skiddaw with some higher breaks, varied in and out of showers, though tops struggle to clear.	
Chance of cloud free summits?	30%	
Sunshine? Air clarity (below cloud)	Only glimpses of sunshine, best east and north. Visibility often poor in rain and cloud.	
How Cold? (at 750m)	6 or 7C. Feeling just below freezing in direct wind.	
Freezing Level	Above the summits

## **Planning Outlook**

#### All mountain areas of Britain from Friday, 12 September, 2025

Unsettled southwesterlies dominate through the weekend into early next week - often windy with frequent rain, cloud capping the tops. Showery bursts at times with a risk of hail and thunder. Driest and highest cloud bases toward eastern Scotland. Temperatures on the cool side, often feeling below freezing in exposure to wind on higher terrain. During Sunday and into Monday, a deeper Atlantic low is expected to move in, bringing more extensive heavy rain and gales - the strongest wind probably focused on England & Wales. Some improvement expected for a time into middle of next week, but the longer range outlook into late September remains unsettled.

#### Forecast issued at 16:16 on Wednesday, 10 September, 2025

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
