The heaviest rain across Wales and southwest Scotland, pushing further across the southern Highlands with time. Driest conditions for northern Scotland early in day; briefly drier Pennines mid-late morning.

Headline for Lake District

Upland gales. Rain much of day, heaviest south.

Detailed Forecast for Sunday, 19 October, 2025

How windy? (On the summits)	Southeasterly 30 to 50mph, speed varying during day, often very gusty around higher tops; starting to lessen later.
Effect of wind on you?	Expect challenging walking conditions over higher fells, gusts knocking you off balance. Marked wind chill.
How wet? (Precipitation and its impact)	Raining most of day, particularly southern fells; heavy rain setting in widely Rain and drizzle from dawn most persistent south Lakes, less at first in north. More constant and heavy rain setting in widely for many hours. Starting to break up and fade only beyond dusk.
Cloud on the hills?	Extensive, lowest south Shrouding many fells all day, from low to mid-heights upward in southern areas. Higher base northwards, but rarely above 600-700m, covering most higher fells.
Chance of cloud free summits?	Below 10% south, 20% north.
Sunshine? Air clarity (below cloud)	Sun unlikely, overcast all day. Hazy, or widely murky in rain, poorest in southern areas.
How Cold? (at 750m)	7 or 8C. Feeling near -5C directly in the wind.
Freezing Level	Above the summits

All mountain areas of Britain from Monday, 20 October, 2025

A mixed outlook into the new week as low pressure dominates with areas of rain and showers , which will vary locally day-to-day. Some windows of drier weather, particularly central parts of the Highlands. Wind speeds will also vary, but some lulls, but abrupt spells of upland gales possible. Risk of heavier rain spreading from Wales into northern England and southern Scotland later Wednesday into Thursday. Likely significantly colder later in the week with northerly winds, dropping below freezing on higher mountains, with snow showers especially Scottish Munros.

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
