

Lake District

The entire Lake District National Park, taking in all major summits, including Scafell, Helvellyn, Skiddaw, the Langdales and Old Man of Coniston.

Wheelwrights Cottages provide a wide range of self-catering accommodation around Langdale and beyond to suit all requirements. Please call us on 015394 37635 for details or go to www.wheelwrights.com

General Summary for Monday, 10 November, 2025

British Mountain Summary:

Based on forecast chart for noon 10 November, 2025

Heavy rain for much of the Highlands from dawn into the morning, moving northwards, clearing to leave patchy rain, local showers in west; cloud base rising. Some showery rain in the Lakes, drier Pennines. Showers in Wales merging into clusters of heavy rain. Moderate to locally gusty southerly winds.

Headline for Lake District

Brisk winds. Low cloud and local showery rain; better north.

Detailed Forecast for Monday, 10 November, 2025

How windy? (On the summits)	Southerly 25 to 30mph, strongest more often on western fells.
Effect of wind on you?	Feeling noticeably blustery on exposed higher terrain, starting to affect comfortable walking; marked wind chill.
How wet? (Precipitation and its impact)	Often dry, some showers Bursts of rain around or before dawn tending to ease, but occasional light showery rain drifts onto coastal hills for a few hours, fading. Often dry many inland/north areas. Toward dusk, possible bursts of rain returning.
Cloud on the hills?	Mostly southern tops, breaks north Banks of cloud mostly over southern areas in the morning, where likely to linger on higher terrain. Rising and breaking toward many upper slopes further north.
Chance of cloud free summits?	30% south, 60% north.
Sunshine? Air clarity (below cloud)	Intermittent sunshine, best in north. Visibility very good away from patchy cloud.
How Cold? (at 750m)	5 or 6C. Feeling below freezing if exposed to wind, nearer -5C on higher tops.
Freezing Level	Above the summits

Lake District - Looking Ahead

	Tuesday 11 November	Wednesday 12 November
How windy? (On the summits) Effect of wind on you?	Southerly, strengthening rapidly from before dawn to 40 to 50mph in morning, reaching 60mph with stronger gusts. Soon arduous walking conditions, increasingly difficult mobility over higher terrain. Marked wind chill despite mild air.	Southwesterly 25-35mph or stronger before dawn, easing gradually to 20mph, turning southerly; may increase into night. Blustery, affecting comfortable walking on higher areas in the morning, tending to lessen during daytime.
How wet? (Precipitation and its impact)	Rain all day, often heavy Rain widespread throughout the day, sustained heavy falls likely, particularly southwestern areas. Streams in spate, renewed flooding.	Local drizzle, more rain by evening Very wet underfoot with streams in spate and flooding following previous rain. Pockets of drizzle mainly south Lakes, but much of daytime substantially dry. Evening onward, risk further heavy rain.
Cloud on the hills?	Extensive, lowest south Blanket low cloud across the fells, from lower slopes upward south and southwest areas, 500-600m further northeast across Lakeland.	Most persistent low cloud south Banks of cloud from lower elevations upward in the morning, remaining most persistent over southern fells. Some breaks toward north Lakes.
Chance of cloud free summits?	Below 10%	20% S/SW, to 40% N Lakes.
Sunshine? Air clarity (below cloud)	Overcast and murky, better visibility locally toward north Lakes if drier.	Mostly cloudy, some weak sun mainly northeast Lakes. Misty areas may linger, but some local good visibility mainly north and east.
How Cold? (at 750m) Freezing Level	5C soon rising from dawn to 7C, reaching 9C from noon; only small fall with height. Feeling nearer -5C directly in the wind. Above the summits	8C. Feeling like 0C or below if in stronger wind. Above the summits

Planning Outlook**All mountain areas of Britain from Tuesday, 11 November, 2025**

Unsettled south-southwesterlies through midweek, periods of heavy rain widespread, further flooding for Wales, the Lakes and southwest Scotland. Mountain gales on Tuesday for England, Wales, S & E Scotland. Cooler than recently in Scotland, but still generally mild England and Wales by day and night.

Later in the week, colder air pushes into Scotland, dropping below freezing over the mountains, with some snow over higher terrain in the Highlands on Thursday-Friday; strong to gale force easterly winds develop widely. Colder northeasterly air is expected to become more widespread into the weekend and next week.

Forecast issued at 16:00 on Sunday, 9 November, 2025
