

Lake District

The entire Lake District National Park, taking in all major summits, including Scafell, Helvellyn, Skiddaw, the Langdales and Old Man of Coniston.

Wheelwrights Cottages provide a wide range of self-catering accommodation around Langdale and beyond to suit all requirements. Please call us on 015394 37635 for details or go to www.wheelwrights.com

General Summary for Monday, 17 November, 2025

British Mountain Summary:

Based on forecast chart for noon 17 November, 2025

Cold everywhere, staying sub-zero over high terrain, plus some frost lower down in morning; considerable chill factor if exposed to wind, but speeds tending to lessen all areas. Largely dry, local snow flurries moving in northern Scotland. Some patchy cloud mostly northern half of the Highlands, sunnier elsewhere.

Headline for Lake District

Strongest wind early, easing. Dry with sun, hills clear.

Detailed Forecast for Monday, 17 November, 2025

How windy? (On the summits)	Northeasterly 25-30mph at or just before dawn, soon easing and shifting northwesterly, to 15mph or at times less middle of day. Increasing a little through dusk to 20mph, later 30mph into night.
Effect of wind on you?	Walking strenuous at dawn with wind chill, soon trending towards fairly small impacts.
How wet? (Precipitation and its impact)	No precipitation
Cloud on the hills?	Little or none Rare fragments around some slopes in the morning, but the fells largely clear all day.
Chance of cloud free summits?	Above 90%
Sunshine? Air clarity (below cloud)	Widely sunny with excellent visibility.
How Cold? (at 750m)	-1 or 0C. May rise slightly on sun-exposed slopes. Feeling like -10C in strongest wind at first.
Freezing Level	600-700m, though frost likely on lower slopes and into inland valleys in morning.

All mountain areas of Britain from Tuesday, 18 November, 2025

A cold week ahead, staying below freezing across all mountains, much terrain will be frozen from valleys upward. An area of low pressure and associated fronts will pass southeastward during Tuesday, bringing some persistent snowfalls, including to lower slopes particularly inland across the Highlands, some substantial accumulations over higher terrain. Strong to gale force northerlies Wednesday-Thursday, bringing snow and hail showers focused on northern Scotland and onto north-facing coastal districts elsewhere. By Friday into next weekend, winds shift back westerly and freezing levels rise to upper slopes - some rain likely, snow on high tops at times.

Forecast issued at 15:00 on Sunday, 16 November, 2025

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
