All mountain areas of Britain from Thursday, 20 November, 2025

Prepare for winter conditions - snow covering many mountains to lower slopes in Scotland, snow and ice cover varied for England & Wales, but much terrain frozen; hard frosts into inland valleys and glens the next couple of nights. Continuing strong northerlies into Thursday, showery snow and hail gradually fading from northwest Scotland. A front moving into Scotland from the west on Friday brings gales and snow, turning to rain lower down - in England & Wales more likely develops Friday evening-night. Less cold into the weekend, but higher mountains stay near or just below freezing, particularly Scotland; showers or locally more frequent upland snow over several days forward.
