

# Lake District

The entire Lake District National Park, taking in all major summits, including Scafell, Helvellyn, Skiddaw, the Langdales and Old Man of Coniston.

**Wheelwrights Cottages provide a wide range of self-catering accommodation around Langdale and beyond to suit all requirements. Please call us on 015394 37635 for details or go to [www.wheelwrights.com](http://www.wheelwrights.com)**

## General Summary for Sunday, 24 May, 2026

### British Mountain Summary: Based on forecast chart for noon 24 May, 2026

High pressure bringing dry and warm conditions to England and Wales and southern and eastern Scotland with early patchy hill fog in the west dispersing. Warm or very warm in valleys, beware of sunburn and dehydration. Blustery south-westerly winds will feed low cloud and drizzly rain across northwest Scotland.

### Headline for Lake District

A dry and increasingly warm day with extensive and strong sunshine.

## Detailed Forecast for Sunday, 24 May, 2026

|                                                |                                                                                                                                                    |
|------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>How windy? (On the summits)</b>             | South to south-westerly 10 to 20mph                                                                                                                |
| <b>Effect of wind on you?</b>                  | Mostly small                                                                                                                                       |
| <b>How wet? (Precipitation and its impact)</b> | Dry                                                                                                                                                |
| <b>Cloud on the hills?</b>                     | <b>Very little</b><br>Aside from some patches of banks across coastal hills early in morning, which will burn off, fells are expected to be clear. |
| <b>Chance of cloud free summits?</b>           | <b>90%</b>                                                                                                                                         |
| <b>Sunshine?</b><br>Air clarity (below cloud)  | Extensive sunshine coming through.<br>Very good visibility.                                                                                        |
| <b>How Cold? (at 750m)</b>                     | Lifting to 15C                                                                                                                                     |
| <b>Freezing Level</b>                          | Well above the summits                                                                                                                             |

## Lake District - Looking Ahead

|                                                                     | <b>Monday 25 May</b>                                                                                                                                                           | <b>Tuesday 26 May</b>                                                                                                                      |
|---------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
| <b>How windy? (On the summits)</b><br><b>Effect of wind on you?</b> | South-westerly 10 to 20mph, generally strongest in the morning when perhaps briefly touching 25mph over tops.<br><b>Mostly small</b>                                           | Westerly 10mph, becoming variable in direction 5-10mph. Locally 15mph where any coastal sea breezes develop.<br><b>Mostly negligible</b>   |
| <b>How wet?</b><br>(Precipitation and its impact)                   | <b>No rain expected</b>                                                                                                                                                        | <b>Very likely dry</b><br>Small risk of an isolated shower bubbling up well inland.                                                        |
| <b>Cloud on the hills?</b>                                          | <b>Patches varying heights, soon clearing.</b><br>From dawn, some patches of banks at varying heights, but they will soon lift and disperse to leave the fells clear of cloud. | <b>Fells clear</b><br>Perhaps some early fragments of mist and low cloud, mainly around coastal hills in the west. Otherwise, fells clear. |
| <b>Chance of cloud free summits?</b>                                | <b>Lifting to 90%</b>                                                                                                                                                          | <b>90%</b>                                                                                                                                 |
| <b>Sunshine?</b><br>Air clarity (below cloud)                       | Sunshine breaking through widely.<br>Visibility very good.                                                                                                                     | Widespread sunshine, but cloud may bubble up inland in the afternoon.<br>Visibility very good.                                             |
