

Lake District

The entire Lake District National Park, taking in all major summits, including Scafell, Helvellyn, Skiddaw, the Langdales and Old Man of Coniston.

[Wheelwrights Cottages provide a wide range of self-catering accommodation around Langdale and beyond to suit all requirements. Please call us on 015394 37635 for details or go to www.wheelwrights.com](http://www.wheelwrights.com)

General Summary for Tuesday, 9 June, 2026

British Mountain Summary:

Based on forecast chart for noon 9 June, 2026

Generally showery, heavy bursts with risk of thunder, particularly more eastern areas afternoon into evening. Strongest west to southwesterly winds for England and Wales. Rather chilly, notable wind chill in exposure on hills. Cloud varying over the tops.

Headline for Lake District

Cool, increasingly windy, heavy showers.

Detailed Forecast for Tuesday, 9 June, 2026

<p>How windy? (On the summits)</p> <p>Effect of wind on you?</p>	<p>Southwesterly 20 to 25mph in morning, stronger gusts near showers, then shifting westerly, rising to 30mph afternoon, gusts 35-40mph for a few hours, then lessening a little up to dusk.</p> <p>Blustery, increasingly impeding ease of walking over the tops into the afternoon, buffeting gusts affect balance on ridges. Considerable wind chill.</p>
<p>How wet? (Precipitation and its impact)</p>	<p>Frequent showers, chance of lightning.</p> <p>Frequent precipitation through the day, in the form of shower after shower feeding in across the fells. Some hail mixed in with the risk of thunder inland. Somewhat drier later afternoon, soonest in western areas.</p>
<p>Cloud on the hills?</p> <p>Chance of cloud free summits?</p>	<p>Frequently covering upper slopes</p> <p>Fairly extensive above 500-700m at first, lowest in west, but bases rising to become mostly around 700-900m afternoon, some breaks to tops, mainly well inland. Ragged lower patches in showers.</p> <p>30% rising to 60%</p>
<p>Sunshine? Air clarity (below cloud)</p>	<p>Often cloudy, limited patches of sun, but breaking through near west coast afternoon. Visibility poor for periods due to rain, intermittently very good.</p>
<p>How Cold? (at 750m)</p> <p>Freezing Level</p>	<p>4C lifting to 6C. Feeling like -5C directly in the wind.</p> <p>Above the summits</p>

Lake District - Looking Ahead

	Wednesday 10 June	Thursday 11 June
How windy? (On the summits) Effect of wind on you?	Westerly 15 to 25mph, tending to rise into afternoon, 30mph on higher fells afternoon and into evening. Fairly small in morning, more noticeably blustery with time, marked wind chill where exposed to the strongest breeze.	Southerly turning west-southwesterly later, 25 to 35mph, gusty 40mph at times. Blustery over higher terrain, at times affecting ease of walking and balance on exposed ridges. Considerable wind chill.
How wet? (Precipitation and its impact)	Showery, risk thunder; then improving Showers spread inland from west in morning and develop to give heavy bursts for a few hours, Risk some hail, isolated thunder. Showers clear eastward to be drier by later afternoon. Local light showers in evening.	Persistent rain Rain arriving from before dawn, some steadier heavier falls for periods through the morning. May break up a little in afternoon, but still often raining.
Cloud on the hills?	Often covering tops, rising Varying, but tops often covered through the day, especially towards west coast in the morning. Breaks to tops best in afternoon away from showers.	Extensive low cloud Blanket low cloud across the fells, to lower slopes south and western areas, highest bases further north and east, but rarely above 600m.
Chance of cloud free summits?	50%	Below 10%
Sunshine? Air clarity (below cloud)	Variable cloud and patchy sun, best sun early in day well inland. Visibility mostly good, but poor in showers.	Overcast and dull, murky toward coasts. Poor visibility much of day in rain.
How Cold? (at 750m) Freezing Level	3C lifting to 6C. Feeling below freezing in the stronger breeze. Above the summits	5C rising to 9C. Feeling like 0 to -5C directly in wind. Above the summits.

Planning Outlook**All mountain areas of Britain from Wednesday, 10 June, 2026**

A changeable pattern continues this week with west-southwesterly winds prevailing, bringing a mix of rain and showers in from the Atlantic. A period of more persistent rain on Thursday. Pressure tends to rise from the south toward the weekend, bringing warmer air and drier conditions particularly England & Wales, although western mountains will remain often cloudy, some patchy rain remaining in west and northwest Scotland into the weekend. Into next week, a mixed southwesterly pattern remains possible, with some rain, drizzle and low cloud mostly in the west, but with higher pressure trying to expand northward, the week looks generally drier and warmer than the present time.

Forecast issued at 16:00 on Monday, 8 June, 2026

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
