

Lake District

The entire Lake District National Park, taking in all major summits, including Scafell, Helvellyn, Skiddaw, the Langdales and Old Man of Coniston.

Wheelwrights Cottages provide a wide range of self-catering accommodation around Langdale and beyond to suit all requirements. Please call us on 015394 37635 for details or go to www.wheelwrights.com

General Summary for Sunday, 13 September, 2026

British Mountain Summary:

Based on forecast chart for noon 13 September, 2026

A fine day for most places with light winds. Varied cloud around some hill slopes early in the day tending to lift and break, sunny spells. Risk of more cloud lingering over hills in Wales, some rain and drizzle in the south as a front stays nearby. Southwesterly breezes increase later western Scotland.

Headline for Lake District

Early misty cloud lifting, wind drops light, some sun.

Detailed Forecast for Sunday, 13 September, 2026

How windy? (On the summits) Effect of wind on you?	West-northwesterly 20mph at dawn, easing during morning, to 10mph by middle of day, later southwesterly. Rising from dusk to 25mph into night. Feeling chilly in a fresh breeze early morning, becoming small.
How wet? (Precipitation and its impact)	Largely dry Chance a brief drizzly shower, mainly southwestern fells early in day.
Cloud on the hills? Chance of cloud free summits?	Varied patches lifting and mostly clearing Patchy cloud on some mid to upper slopes from dawn into morning, mostly toward southwest. Highest tops may start near top of the cloud, then banks drift up to tops - may come and go for a few hours western Lakes, but clearing from most summits into afternoon. More often clear all day north and east. Low cloud returns into night. 60% rising to 80%
Sunshine? Air clarity (below cloud)	Variable sunshine and cloud, sunnier near coast afternoon. Visibility excellent away from early misty slopes.
How Cold? (at 750m) Freezing Level	8C rising to 11C during day, then little change or slight further rise into night. Feeling like 2C in early wind. Above the summits.

All mountain areas of Britain from Monday, 14 September, 2026

Staying unsettled during the next week to 10 days as westerlies prevail - areas of low pressure passing north of Scotland with frontal systems bringing frequent rain, wettest over western mountains in Scotland. Often windy, gale-force westerly winds for periods over higher terrain. Fairly warm and humid on Monday, then on the cooler side for several days, with considerable wind chill on the mountains. Higher pressure and better weather tends to expand further north later in month.

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
